**High Impact Practices in Higher Education** Enakshi Sengupta, 2023-09-27 Collating various case studies policies and other real world research this book examines effective high impact learning practices and demonstrates approaches that promote learning communities and common intellectual experiences

*The Place of Ethics in Science Education* Amanda McCrory, Michael J. Reiss, 2023-08-24 Science education particularly school science education has long had an uneasy relationship with ethics being unsure whether to embrace ethics or leave it to others In this book the authors argue that while the methods of science and of ethics are very different ethics plays a key role in how science is undertaken and used And so ethics has a central place in science education whether we are talking of school science education for students of all ages or the informal science education that takes place in through internet books magazines TV and radio or in places such as hospitals and zoos Written for science educators based in schools and elsewhere the authors make no assumptions that the reader has any knowledge of ethics beyond the background understandings of morality that virtually all of us have Empowered with the knowledge shared in this book readers will feel confident about the place that ethics has in science education The authors provide a rich array of examples as to how science education both in school and out of school and for all ages can be enhanced through including teaching about ethics

**Addressing Special Educational Needs and Disability in the Curriculum: Science** Marion Frankland, 2017-05-18 The SEND Code of Practice 2015 reinforced the requirement that all teachers must meet the needs of all learners This topical book provides practical tried and tested strategies and resources that will support teachers in making science lessons accessible and exciting for all pupils including those with special needs The author draws on a wealth of experience to share her understanding of special educational needs and disabilities and show how science teachers can reduce or remove any barriers to learning Offering strategies that are specific to the context of science teaching this book will enable teachers to help all students develop their evidence gathering skills and aid their scientific discovery by involving the use of all of the senses and structuring tasks appropriately create a supportive environment that maximises learning opportunities plan the classroom layout and display to enhance learning use technology to adapt lessons to the needs of individual pupils successfully train and fully use the support of their teaching assistants An invaluable tool for continuing professional development this text will be essential for teachers and their teaching assistants seeking guidance specific to teaching science to all pupils regardless of their individual needs This book will also be of interest to SENCOs senior management teams and ITT providers In addition to free online resources a range of appendices provide science teachers with a variety of writing frames and activity sheets to support effective teaching This is an essential tool for science teachers and teaching assistants and will help to deliver successful inclusive lessons for all pupils
