Jewell, Andrew Roberts, Nick Geere, Sue
Pope**

Edexcel Math Paper June 2013:

What is a Mathematical Concept? Elizabeth de Freitas, Nathalie Sinclair, Alf Coles, 2017-06-22 Responding to widespread interest within cultural studies and social inquiry this book addresses the question what is a mathematical concept using a variety of vanguard theories in the humanities and posthumanities Tapping historical philosophical sociological and psychological perspectives each chapter explores the question of how mathematics comes to matter Of interest to scholars across the usual disciplinary divides this book tracks mathematics as a cultural activity drawing connections with empirical practice Unlike other books in this area it is highly interdisciplinary devoted to exploring the ontology of mathematics as it plays out in different contexts This book will appeal to scholars who are interested in particular mathematical habits creative diagramming structural mappings material agency interdisciplinary coverings that shed light on both mathematics and other disciplines Chapters are also relevant to social sciences and humanities scholars as each offers philosophical insight into mathematics and how we might live mathematically

OECD Reviews of Vocational Education and Training

Apprenticeship in England, United Kingdom Kuczera Małgorzata, Field Simon, 2018-04-11 One of a series of studies on vocational education and training this review focuses on the apprenticeship system in England and concludes with policy recommendations

Ethics and Mathematics Education Paul Ernest, 2024-06-10 This edited volume is an inquiry into the ethics of mathematics education and to a lesser extent the ethics of mathematics The imposition of mathematics for all raises questions of ethics What are the ethics of teaching school mathematics What are the costs as well as the benefits What are the ethical issues raised by the official aims of mathematics teaching the planned curriculum the pedagogies employed in school and college mathematics and the assessment systems These questions are addressed in the book as well as what systems of ethics we might use The volume ventures into a burgeoning new field It offers a unique set of investigations both theoretical and in terms of practices It announces the ethics of mathematics education as a new subfield of research and includes valuable contributions from many of the best known researchers in mathematics education additionally it is a valuable resource for students teachers and researchers in the field This is an enduring and classic source book in the field From the wisdom of leading scholars to the little heard voices of students this collection offers the reader many striking new insights into the ethics of mathematics and education

Learning to Teach History in the Secondary School Terry

Haydn, Alison Stephen, James Arthur, Martin Hunt, 2014-10-10 An excellent companion to Learning to Teach in Secondary School full of good ideas and better advice Mentors will certainly want to use it and so I m sure will the rest of the history department Make sure they buy one and keep your copy under lock and key Michael Duffy Times Educational Supplement A very well written and readable book Overall this is an excellent book and one which students and teachers outwith England would find a valuable addition to their library Scottish Association of Teachers of History Resources Review This book is without question the standard text for the history PGCE market Dr Ian Davies University of York on the first edition Learning

to Teach History in the Secondary School provides an accessible introduction to teaching and learning history at secondary level Underpinned by a theoretical perspective and backed up by the latest research it encourages student teachers to develop a personal approach to teaching history This fourth edition has been thoroughly updated for the new curriculum with a brand new chapter on subject knowledge and a new section on action research to better support those reflecting on and developing their own practice It provides an array of references and materials that give a sound theoretical foundation for the teaching of history including weblinks to further resources while a range of tasks will enable students to put their learning into practice in the classroom Practical advice is combined with reference and access to a wide range of recent and relevant research in the field of history education to support Masters Level research and aid reflective practice Key issues covered include The benefits of learning history Planning The use of language and strategies for teaching Inclusion Technology in history teaching Assessment Continuing professional development Offering comprehensive and accessible support to becoming a history teacher this book remains an invaluable resource for all training and newly qualified history teachers
