How World Events Are Changing Education, 2022-02-07 Listen to the podcast. Education was established to create employees for 19th and 20th century manufacturing models. The 21st century requires a rethink. Change is happening fast with jobs not guaranteed as robots are taking over routines. We must prepare students for uncertainty, higher level employment, helping them think and communicate instead of retain and recall facts for passing exams. Some curricula is either irrelevant for today or gained at the press of a button. Listening and literate talk narratives for collaboratively solving real problems should be the focus, not facts forgotten after tests. The book explores this important debate.
