more serviceable to others if it is presented in such a manner that its relations to the whole subject are made clear Not only so we may often benefit ourselves by systematically setting forth the place of our individual studies in geography as a whole for we may be thereby led to discover that the systematic sequence of parts is interrupted here and there by gaps which can be filled by well directed effort But it is manifest that if we should attempt to make exposition of our ideas concerning the relation of our own studies to the whole subject we must have previously gained a tolerably definite idea of the nature of the whole Very likely we each have some such conception If so it would be profitable to institute a collection and a comparison of opinions though it can hardly be doubted that they would show much diversity Examples of Geographical Statements As a contribution towards such a collection of opinions I propose to consider the nature or content of geography in this essay but instead of presenting an abstract definition of the subject the problem will be regarded from the other side About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works
