

ANATOMY OF A CTS STUDY GUIDE

Left side of the guide: **Section and Outcome.** This column lists the CTS sections (I-VI) and the purpose of each section

Section I. Content Knowledge- This section identifies what all science literate adults (including teachers) should know and be able to do as well as what all students should know and be able to do at the end of their K-12 education. It also provides examples of phenomena and explains concepts and ideas encountered in the media, public issues, and other popular science venues in which an adult understanding of science is important.

Section II. Concepts, Core Ideas, or Practices- This section identifies the specific concepts, ideas, and/or practices within a learning goal, their level of sophistication, and the appropriate terminology to be used at different grade levels.

Section III. Curriculum, Instruction, and Formative Assessment- This section identifies important considerations for curriculum, provides suggestions for instruction, and gives examples of formative assessment probes that reveal students' ideas and can be used to inform instruction.

Section IV. Research on Commonly Held Ideas- This section identifies related research on developmental considerations, common alternative ideas, sources of misconceptions, intuitive ideas, types of reasoning used by students, and difficulties encountered in understanding scientific ideas.

Section V. K-12 Articulation and Connections- This section examines the K-12 conceptual growth in understanding as a coherent flow of ideas that build in complexity over time. It helps identify important prerequisites for learning, and connections between ideas within and across topics.

Section VI. Assessment Expectation- This section helps the user clarify and unpack the meaning and intent of their own state standards and assessment expectation. It also helps identify important, key ideas or practices that may be missing at the state or local level, or placed at a grade span that differs from the Framework or NGSS.

Optional Resources- At the bottom of each study guide is a link to the CTS web site, where users can find additional resources to support CTS. At the bottom of each guide, users can add their own resources.

Right side of the guide: **Selected Resources and Readings for Study and Reflection.** includes the selected readings from the CTS common set of resources for study and reflection that correspond to each of the outcomes, I-VI. Each section provides multiple choices of source material (A, B, C, D, and/or E choices). Depending upon availability, duplicate material, and the CTS guide selected, users may choose to read sections from more than one resource or choose to use only one.
