Prompt: Why do you want to go to college?

The air is tainted with unnatural fumes of grease, wood, and burnt electrical tape. Oil slicks stain the floor. Thick wooden shelves sag unnervingly close to buckling under the weight of old house paint and power tools. A workbench lies buried beneath papers, rulers, cans, and metal shards. An uncomfortable growl pours from the water heater. Most people wouldn't describe my grimy garage as pleasant, but I love spending my free time here. It's where I built a 2 ft trebuchet in sixth grade, a 4 ft trebuchet in seventh grade, and plan to build an 8 ft trebuchet this winter break. It's where I built a battlebot and slapped an Arduino microcontroller on top to give it intelligence. Ever since I sat watching jets shake the sky and explosions rock the screen in the movie Iron Man as a stunned sixth grader, I've spent weekends experimenting in my garage, trying to learn everything I can about engineering and robotics.

Sure, outside of my garage I love wildlife and hiking, history, and weird foods. I love classic rock, jazz, and maybe even secretly Katy Perry. Nevertheless, I've always had a life plan centered on robotics: go to a great college, learn robotics, build robots, get a Bernese mountain dog, and live happily ever after in a beautiful forest home. It seems strange that I've committed myself to robotics so easily despite my many interests, but in reality, robotics combines nearly all of them. Computer science, electrical engineering, and mechanical engineering are crucial to the robot, but combine them with biology, astronomy, music, or ecology, and that's when robotics becomes amazing. I could help the sick with robots that give surgeons more dexterity while operating. I could help the poor with affordable, robot-made products. I could aid the elderly, replace the limbs of wounded warriors, and keep fire fighters from harm's way, all with robots. Although these robots may not be the crimson and gold Iron Man suit that first got me interested, I love the realistic and heroic possibilities in the field of robotics.

Almost as exciting as imagining the robots I could build, is imagining where I could build them. I could become a professor and research cutting edge A.I. algorithms. I could become an entrepreneur and bring my creations to market. I could even become an employee for a tech company and devote myself to its latest innovations. Maybe next year around this time, I will even be studying on the Freshman Quad. With the LCSR robotics lab, the minor in robotics, a
