**Bioinspired Strategic Design** Daniel J. Finkenstadt,Tojin T. Eapen,2024-07-08 Organizations are commonly thrust into hostile operating environments where they are required to make strategic decisions that involve significant and costly tradeoffs Such hostile environments may be endemic such as an economic recession or idiosyncratic such as a predatory action by an adversary Many features of such hostile environments parallel those of living organisms that also demonstrate fine tuned strategies to improve their survivability under adverse conditions How can organizations use these bioinspired strategies to survive and even potentially innovate This book shows that the same three capabilities essential for the survival of living organisms in harsh environments efficiency resilience and prominence are also critical for organizations in their process of navigating through their own hostile environments Throughout the book the authors provide organizational executives with a systematic framework for thinking about strategic decision making in a hostile environment leaning on analysis of real world cases to draw out ontologies and methods for guiding their teams through disruptions change management innovation and process improvements In the first part organizations are provided with a systematic approach to analyzing three survivability influences forces resources and observers and their interrelationships While all three influences

are active across all organisms and organizations the exact nature of their interrelationship and the significance of each influence are unique to every organism or organization The framework helps organizations nail down the specific features of their operating environment that can help or hinder survivability by analyzing the three influences Organizations can respond to external influences by developing three pronged capabilities efficiency resilience and prominence ERP that respond to the three survivability influences Organizations often struggle with identifying the appropriate strategies to apply under different conditions Fortunately nature provides several mechanisms that can be analogically applied to guide business strategies The book contains many illustrations and examples of strategic principles observed among living organisms that can help an organization develop ERP capability Finally the book introduces seven strategic design heuristics Combination Elimination Separation Segmentation Replication Dynamics and Maximization observed in a living system that can be flexibly utilized to generate ideas to achieve strategic ends [AI Trends Newsletter](#) ,1992 *Environmental Landscape and Sustainable Biodiversity for Healthy Green Growth* Javid Ahmad Parray,Nowsheen Shameem,A. K. Haghi,2025-03-11 This unique reference book represents sustainable development of UN for providing a proper life standard and mobility for people The 17 sustainable development goals SDGs as set by the United Nations for 2030 are the most basic prerequisite for the growth and development of national health This book also provides broad case studies to show the interconnection of sustainable development goals of healthy lifestyle that will have enormous impacts on proper environmental health standards In this advanced reference book the authors will invite experts from around the globe to help the readers to better understand the interconnection between the UN sustainable development goals and environmental sustainability for 2030 To achieve these goals the authors have divided this reference book into four sections The first section of this research oriented book is devoted to reviewing the basic concepts of the healthy environmental sustainable development goals by considering the current world population of 7 billion The plan is that the chapters selected in this section should provide the most important aspects needed in detail In Section 2 to reach novel technology innovations for making changes in environment health policy the requirements for making remarkable challenges along with the global economy are reviewed Section 3 is used as a practical guide for postgraduate students interested in gaining their knowledge in the area of the environmental sustainability without a strong background in all 17 SDGs as set by the United Nations for 2030 and the different aspects of the sustainability for a healthier lifestyle Section 4 addresses case studies to cover conceptual framework on how to better understand the sustainability goals and synergies among organic food green energy and clean water technologies It also exchanges valuable experiments in this multidisciplinary field by renowned research scientists [Special Issue: African Youth Livelihoods](#) Adam Cooper,Sindi-Leigh McBride,Boitumelo Matlala,Hayley Abrahams,2025-01-03 The Special Issue The purpose of this special issue is to bring together contributions exploring African youth livelihoods to expand understanding of how young Africans make a living Demographers estimate that by 2030 half of the world s youth will be African This

burgeoning increase in human beings on the continent usually leads to debates on demographic dividends centred on how to cash in on human capital or the threats posed by large number of unemployed and poorly educated people on the African continent This special issue is therefore important for challenging conventional framing of young Africans in developmental discourses questioning for instance how young Africans are studied who studies them from what perspectives and why The Originality of the Special Issue Importantly the majority of the included authors are young Africans themselves advancing not only the theoretical methodological and empirical aspects of research on issues affecting young people in Africa but also expanding youth participation in academic publishing Thematically the contributions cover topics ranging from the digital divide on the continent to the role of gender in the entrepreneurial activities of young people from the motivations behind agricultural livelihoods to the impact of conflict on income generation and more In addition to this thematic range the issue highlights the critical importance of young African researchers contribution to identifying and responding to key research gaps in youth livelihoods research
