- Unique 5-ton capacity forklift concept with high added value - capable of working under extreme conditions in all kinds of terrains and also on mixed surfaces for semi-industrial use. Compact size forklift with high stability in difficult terrains that achieves high performance in tough tasks in diverse surroundings where a great productivity and safety of operators is demanded.

- Functional forklift with exclusive design: Great diameter forklift wheels permit great chassis ground clearance and optimal cargo stability on forks to minimize the possibility of cargo falling when working on uneven and different grounds under intensive task. Forklift with a high operational safety and excellent dynamic stability that generates high productivity in material handling.

- High technology forklift equipped with progressive hydrostatic transmission, low consumption and low noise KUBOTA engine, RUSA differential axles with epicycloidal wheel reduction, exclusive and reliable on-demand FullGripSystem, integral and tilting closed cabin, fully-integrated functions joystick for a total control of operation.

- Low weight forklift equitably distributed between both axles too achieve a minimum soil erosion and compaction while permitting its use in soils with low resistance to weight. Its low weight contributes to a low consumption in comparison with other rough terrain forklifts of its category. Great width and flotation lines distribute weight uniformly on the ground therefore reducing the risk of pavement break.

- Low total height forklift (2.2 m) and reduced width (1.8-2.0 m). These are suitable measurements to work under high safety standards and effectiveness under limited height and space areas. Driver's position is located at low level which facilitates access while reducing fatigue.

- Optimal forklift for tasks where steep ramps need to be surpassed, or in very irregular grounds, also when bumps, curbs or slippery and dirty gradients are found (mud, sand, gravel, ice, snow, humidity, ruts, dust, grease, oil, leaves, grass, painted signs, etc). Counterweight of great dimension and advanced design permits high stability at full load capacity for increased safety.

- High performance forklift adequate for working with push and pull attachments such as clamps, buckets, and rear plugs thanks to its high driveability that is achieved thanks to its hydrostatic transmission in combination with its exclusive on-demand "FullGripSystem", by means multiple discs with electro-hydraulic engagement with push button from joystick.

- Forklift specification according to task (Rough terrain or Industrial): B Model for rough terrain use (standard EN 1228-1 A₀) with load chart for uneven soil applications, H₀ Version (optional) for semi-industrial use (standard EN 1228-1 B₀ 1074) with higher load chart for leveled soil applications permitting higher residual loads at high lifting heights (> 4 m).

- Excellent chassis ground clearance combined with a great tilting front and back mast that gives maximum productivity in material handling tasks in rough terrains. In contrast with traditional industrial forklifts, C 500 H model can easily load and unload trucks on uneven and rough grounds under high working safety.

- In contrast with other industrial forklifts that equip low diameter narrow tires with minimum flotation, the C 500 H can use wide base rough terrain or mixed pattern tires for working on any kind of terrain. If terrain is of medium difficulty, 2WD model offers optimum performance due to its more-reduced turning radius compared with 4WD model, without losing load handling stability.

- REXROTH "Automotive" hydrostatic transmission, in contrast with torque-converter ones, simplifies machine movement and maneuverability while sensibly reacting to commands, therefore generating intuitive control of the machine by means of throttle pedal with minimum use of brakes. By means of "riding" pedal, a slow, easy, comfortable machine approximation can be achieved to provide higher productivity and safer operation.

- Roomy and comfortable driver operation post with easy-access operation controls. Single ergonomic heavy-duty joystick with full centralized functions provides total control of operation. Gear/inverter switch integrated in joystick achieves simple, fast, safe driving. Great visibility cabin combined with full-clear masts assures maximum efficiency and safety.

- Exclusive RUSA front folding cabin which facilitates periodical maintenance assuring best machine functioning while obtaining a longer product life span. A wide range of accessories permits to adapt the machine to customer requirements, including high added-value attachments assembled and tested in RUSA premises, that increase functionality.

APPLICABILITY
