**Migration in Africa** Michiel de Haas, Ewout Frankema, 2022-03-30 This book introduces readers to the age of intra African migration a period from the mid 19th century onward in which the center of gravity of African migration moved decisively inward Most books tend to zoom in on Africa's external migration during the earlier intercontinental slave trades and the more recent outmigration to the Global North but this book argues that migration within the continent has been far more central to the lives of Africans over the course of the last two centuries The book demonstrates that only by taking a broad historical and continent wide perspective can we understand the distinctions between the more immediate drivers of migration and deeper patterns of change over time During the 19th century Africa's external slave trades gradually declined whilst Africa's expanding commodity export sectors drew in domestic labor This led to an era of heightened mobility within the region marked by rapidly rising and vanishing migratory flows increasingly diversified landscapes of migration systems and profound long term shifts in the wider patterns of migration This era of inward focused mobility reduced with a resurgence of outmigration after 1960 when Africans became more deliberate in search of extra continental destinations with new diaspora communities emerging specifically in the Global North Broad ranging in its temporal spatial and thematic coverage this book provides students and researchers with the perfect introduction to age of intra African migration

A. Stewart, 2019-07-09 Soil degradation is a widespread problem in Africa resulting in decreased agricultural productivity while demand for food continues to increase Degradation is caused by accelerated erosion acidification contamination depletion of soil organic matter and plant nutrients and salinization The major cause of soil degradation in Africa is uncontrolled and excessive grazing in the savanna regions followed by deforestation and the use of inappropriate and extractive farming practices Perpetual neglect of the health of soils in Africa can exacerbate the already

serious problems of food and nutritional insecurity and environmental degradation Food and nutritional security of the growing population of Africa can only be achieved if degraded soils are restored and soils of agroecosystems are managed prudently and sustainably Ignoring soils and taking the fragile finite and precious soil resources for granted is the principal cause of poverty hunger and environmental degradation The downward spiral must be reversed through soil restoration measures based on translating science into action This book describes the soils of Africa processes of soil degradation extent and severity of soil degradation and the impacts of degradation processes on food and nutritional security Features Explores the extent and severity of soil degradation in Africa Analyzes the cause effect relationship between anthropogenic activities and soil degradation Reviews processes of soil degradation in Africa including erosion salinization nutrient depletion and decline of soil organic matter Addresses the effect of climate change on soil degradation in Africa Explains how soil degradation causes food and nutritional insecurity Part of the Advances in Soil Sciences series this volume is specifically devoted to the processes and factors that cause soil degradation and the challenges and potential for remediation and restoration of soil health in Africa **Urban Sustainability and Justice** Vanesa Castán Broto,Linda Westman,2019-12-15

Urban Sustainability and Justice presents an innovative yet practical approach to incorporate equity and social justice into sustainable development in urban areas in line with the commitments of the UN s Sustainable Development Goals and the New Urban Agenda This work proposes a feminist reading of just sustainability principles to reclaim sustainability as a progressive discourse which informs action on the ground This work will help the committed activist whether they are on the ground working in a community in a non governmental organization NGO in a business at a university in any sphere in government to connect their work to international efforts to deliver environmental justice in cities around the world Drawing on a comparative international analysis of sustainability initiatives in over 200 cities Cast n Broto and Westman find limited evidence of the implementation of just sustainability principles in practice but they argue that there is considerable potential to develop a justice oriented sustainability agenda Highlighting current successes while also assessing prospects for the future the authors show that just sustainability is not merely an aspirational discourse but a frame of reference to support radical action on the ground **Resilience** Zinta Zommers,Keith Alverson,2018-05-09 In Resilience The Science of

Adaptation to Climate Change leading experts analyze and question ongoing adaptation interventions Contributions span different disciplinary perspectives from law to engineering and cover different regions from Africa to the Pacific Chapters assess the need for adaptation highlighting climate change impacts such as sea level rise increases in temperature changing hydrological variability and threats to food security The book then discusses the state of global legislation and means of tracking progress It reviews ways to build resilience in a range of contexts from the Arctic to small island states to urban areas across food and energy systems Critical tools for adaptation planning are highlighted from social capital and ethics to decision support systems to innovative finance and risk transfer mechanisms Controversies related to geoengineering and

migration are also discussed This book is an indispensable resource for scientists practitioners and policy makers working in climate change adaptation sustainable development ecosystem management and urban planning Provides a summary of tools and methods used in adaptation including recent innovations Includes chapters from a diverse range of authors from academic institutions humanitarian organizations and the United Nations Evaluates adaptation options highlighting gaps in knowledge where further research or new tools are needed Library & Information Science Abstracts ,1991 A Revision of the Miocene Hominoidea of East Africa Peter Andrews,1978 **World on the Horizon** Prita Meier,Allyson Purpura,Krannert Art Museum,2018 The multiauthored book accompanying the World on the Horizon exhibition organized by Krannert Art Museum is the first interdisciplinary study of Swahili visual arts and their historically deep and enduring connections to eastern and central Africa the port towns of the western Indian Ocean Europe and the United States At once exhibition catalogue and scholarly inquiry the publication features eighteen essays in a mix of formats personal reflections object biographies as well as more in depth critical treatments and includes never before published images of works from the National Museums of Kenya and Bait Al Zubair Museum in Oman By approaching the east African coast as a vibrant arena of global cultural convergence these essays offer compelling new perspectives on the situated yet mobile and deeply networked social lives of Swahili objects Moving between the broader structural relations of political economic change to more intimate narratives through which such change is experienced the essays throw light on the ways in which the material fabric of the arts structure Swahili people s sense of self and community in an ever changing world of oceanic and terrestrial movement *Record of Proceedings* ,2001 **Recording for the Blind & Dyslexic, ...
