Partial Prestressing, From Theory to Practice M.Z. Cohn, 2012-12-06 These volumes contain the edited documents presented at the NATO Sponsored Advanced Research Workshop ARW on Partial Prestressing from Theory to Practice held at the CEBTP Research Centre of Saint Remy les Chevreuse France June 18 22 1984 The workshop was a direct extension of the International Symposium on Nonlinearity and Continuity in Prestressed Concrete organized by the editor at the University of Waterloo Waterloo Canada July 4 6 1983 The organization of the NATO ARW on Partial Prestressing was prompted by the need to explain and reduce the wide differences of expert opinion on the subject which make more difficult the acceptance of partial prestressing by the profession at large Specifically the workshop attempted to produce a more unified picture of partial prestressing by confronting and where possible reconciling some conflicting American and European views on this subject bring theoretical advances on partial prestressing within the grasp of engineering practice provide the required background for developing some guidelines on the use of partial prestressing in agreement with existing structural concrete standards The five themes selected for the workshop agenda were 1 Problems of Partially Prestressed Concrete PPC 2 Partially Prestressed Concrete Members Static Loading 3 PPC Members Repeated and Dynamic Loadings 4 Continuity in Partially Prestressed Concrete 5 Practice of Partial Prestressing *PCI Journal*, 1999

Structural Connections for Precast Concrete Buildings fib Fédération internationale du béton, 2008-01-01 Connections are among the most essential parts in precast structures Their performance relates to the structural limit states as well as to manufacture of the precast elements and erection and maintenance of the structure itself Proper design of connections is one

major key to a successful prefabrication The principal aim of fib Bulletin 43 is to encourage good practice in the design of structural connections in precast concrete structures This is achieved through a good understanding of structural connections as parts of the overall structural system and of basic force transferring mechanisms The bulletin consists of two parts the first part concerns general considerations and philosophy in the design of structural connections and the second part deals with basic force transferring mechanisms within structural connections The main focus is on the design of structural connections with regard to their structural function in ordinary design situations in the serviceability and ultimate limit states and in accidental abnormal design situations like fire lack of fit and impact accidental loads Other aspects considered include production handling and site erection of elements building physics durability and maintenance Bulletin 43 applies to structural connections for precast concrete buildings although the information on basic force transfer mechanisms can also be applicable to other types of prefabricated structures **Concrete International** ,1993 **Earthquake**
