

CARDIOVASCULAR SYSTEM : ANATOMY & PHYSIOLOGY

FUNCTION OF CIRCULATION

Delivers O₂, nutrients, hormones and antibodies to organs, tissues and cells
Removes the end product of cellular metabolism

FUNCTION OF THE HEART

Pumps oxygenated blood into the arterial system to supply capillaries and tissue
Pumps oxygen poor blood from the venous system through the lungs to be reoxygenated.

ANATOMY OF THE HEART

Cone shaped organ located in the mediastinal space.
The pericardial sac encases the heart and protects it, lubricates and holds 5-20 ml of pericardial fluid. This has two layers.

- the parietal pericardium which is the outer membrane
- the visceral pericardium is the inner membrane attached to the heart.

CONSISTS OF 3 LAYERS

- Epicardium: outermost layer of the heart
- Myocardium: middle layer of the heart, the contracting muscle
- Endocardium: innermost layer of the heart, lines the inner chambers and the valves.

4 CHAMBERS

- Right atrium: carries deoxygenated blood from the body via superior and inferior vena cava
- Right ventricle: carries blood from the right atrium and pumps it into the lungs through the pulmonary artery
- Left atrium: carries oxygenated blood from the pulmonary veins
- Left ventricle: carries oxygenated blood from the left atrium and pumps it into the systemic circuit through the aorta

4 VALVES

Two atrioventricular valves that close at the beginning of ventricular contraction. They prevent blood from flowing back into the atria.

- Tricuspid valve: on the right side of the heart
- Bicuspid valve: on the left side of the heart

Two semilunar valves that prevent blood from flowing back into the ventricles during relaxation

- Pulmonic semilunar valve: between the right ventricle and pulmonary artery
- Aortic semilunar valve: between the ventricle and the aorta.

CORONARY ARTERIES

- Right main coronary artery: supplies the right atrium and ventricle, the inferior left ventricle, posterior septal wall, SA and AV nodes.
- Left main coronary artery: consists of two main branches left anterior descending which supplies blood to the left ventricle and the ventricular septum and circumflex arteries which supply blood to the left atrium and the lateral/posterior aspects of the left ventricle.

BLOOD FLOW OF THE HEART

- From the superior and inferior vena cava oxygen poor blood goes to the
- Right atria through the tricuspid valve
- Right ventricle to the pulmonary valve
- To the pulmonary trunk and arteries into the lungs CO₂ is lost and O₂ is gained in the pulmonary capillaries
- O₂ rich blood enters the pulmonary veins to the left atrium
- Blood travels through the bicuspid valve and enters the left ventricle
- Blood moves through the aortic valve and travels through the aorta to the systemic circuit

Sectional Anatomy of the Heart

ELECTRICAL CONDUCTION

- SA node: pacemaker of the heart and initiates contraction at 80-100 BPM.
- AV: receives impulses from the SA node initiates and sustains impulses at 40-60 BPM
- Bundle of His: continuation of the AV node and branches into the two bundle branches which terminate in the Purkinje fibers
- Purkinje fibers: network of conducting strands beneath the ventricular endocardium. They can act as a pacemaker when the SA and AV fail as pacemakers. They can sustain at 20-40 BPM

web sep 25 2020 in holographic duality a quantum gravity system defined in a $d + 1$ dimensional anti de sitter spacetime is equivalent to a many body system defined on its d dimensional boundary anti de

condensed matter the charted territory chapter 2 holographic - Dec 29 2022

web nov 5 2015 we perceive this as an instructive metaphor for the condensed matter physicist to appreciate the weak strong duality property of the holographic duality it should also be of interest for the high energy physicist to learn about the context where such dualities are in the foreground in condensed matter

references holographic duality in condensed matter physics - Apr 20 2022

web holographic duality in condensed matter physics pp 543 569 doi doi org 10 1017/cbo9781139942492 016 opens in a new window publisher cambridge university press

condensed matter the challenges chapter 3 holographic duality - Jan 30 2023

web nov 5 2015 condensed matter the challenges jan zaanen universiteit leiden yan liu universidad autónoma de madrid ya wen sun universidad autónoma de madrid koenraad schalm universiteit leiden book holographic duality in condensed matter

physics online publication 05 november 2015 chapter doi

tasi lectures on quantum matter with a view toward holographic duality - Jul 24 2022

web holographic duality is a wonderful discovery 1 2 3 which in a certain regime solves certain strongly interacting quantum eld theories in terms of simple classical eld theories in one higher dimension

holographic duality in condensed matter physics request pdf - Jun 03 2023

web nov 5 2015 request pdf holographic duality in condensed matter physics a pioneering treatise presenting how the new mathematical techniques of holographic duality unify seemingly unrelated fields of

lectures on holographic methods for condensed matter physics - Jul 04 2023

web mar 18 2009 lectures on holographic methods for condensed matter physics sean a hartnoll these notes are loosely based on lectures given at the cern winter school on supergravity strings and gauge theories february 2009 and at the ipm string school in tehran april 2009

holographic duality in condensed matter physics - Sep 06 2023

web holographic duality in condensed matter physics this pioneering treatise presents how the new mathematical techniques of holographic duality unify seemingly unrelated fields of physics morphing quantum field theory gen eral relativity and the renormalisation group into a single computational framework this book is the first to bring

holographic duality in condensed matter physics - May 02 2023

web an excellent introduction to the recently discovered holographic duality between gravity and condensed matter physics it clearly explains the growing number of remarkable connections between very different areas of physics gary horowitz university of california santa barbara

holographic superconductivity chapter 10 holographic duality - Apr 01 2023

web nov 5 2015 holographic duality in condensed matter physics pp 328 376 doi doi org 10 1017 cbo9781139942492 011 opens in a new window publisher cambridge university press

lectures on holographic methods for condensed matter physics - May 22 2022

web 1 why holographic methods for condensed matter 1 1 why condensed matter why on the eve of the lhc should high energy and gravitational theorists be thinking about phenomena that occur at energy scales many orders of magnitude below their usual bandwidth three types of answer come to mind

holographic duality in condensed matter physics nasa ads - Feb 28 2023

web preface 1 introduction 2 condensed matter the charted territory 3 condensed matter the challenges 4 large n field theories for holography and condensed matter 5 the ads cft correspondence as computational device the dictionary 6 finite temperature magic black holes and holographic thermodynamics 7 holographic hydrodynamics 8

holographic duality in condensed matter physics sciencegate - Feb 16 2022

web find the latest published papers in holographic duality in condensed matter physics top authors related hot topics the most cited papers and related journals

the unexpected duality of gravitational and condensed matter physics - Sep 25 2022

web apr 1 2019 holographic quantum matter a new book by sean hartnoll andrew lucas and subir sachdev gives an excellent conceptual overview of the field while providing enough technical detail for the reader to perform relevant computations

emg nlg elektromyografie nervenleitungsuntersuchungen - May 11 2023
