The Cosmonaut Who Couldn't Stop Smiling Andrew L. Jenks, 2019-01-15 Let's go with that the boyish grinning Yuri Gagarin launched into space on April 12 1961 becoming the first human being to exit Earth's orbit The twenty seven year old lieutenant colonel departed for the stars from within the shadowy world of the Soviet military industrial complex Barbed wires no entry placards armed guards false identities mendacious maps and a myriad of secret signs had hidden Gagarin from prying outsiders not even his friends or family knew what he had been up to Coming less than four years after the Russians launched Sputnik into orbit Gagarin's voyage was cause for another round of capitalist shock and Soviet rejoicing The Cosmonaut Who Couldn't Stop Smiling relates this twentieth century icon's remarkable life while exploring the fascinating world of Soviet culture Gagarin's flight brought him massive international fame in the early 1960s he was possibly the most photographed person in the world flashing his trademark smile while rubbing elbows with the varied likes of Nehru Castro Queen Elizabeth II and Italian sex symbol Gina Lollobrigida Outside of the spotlight Andrew L. Jenks reveals his tragic and mysterious death in a jet crash became fodder for morality tales and conspiracy theories in his home country and long after his demise his life continues to provide grist for the Russian popular culture mill This is the story of a legend both the official one and the one of myth which reflected the fantasies perversions hopes and dreams of Gagarin's fellow Russians With this rich lively chronicle of Gagarin's life and times Jenks recreates the elaborately secretive world of space age Russia while providing insights into Soviet history that will captivate a range of readers Cosmonaut Cathleen S. Lewis, 2023-08-08 Examining material and cultural representations of the cosmonaut program Cathleen Lewis discusses how the public image of the Soviet cosmonaut developed beginning in the 1950s and the ways this icon has been reinterpreted throughout the years and in contemporary Russia **Soviet Space Culture** E. Maurer, J. Richers, M. Rütters, C. Scheide, 2011-08-16 Starting with the first man made satellite Sputnik in 1957 and culminating four years later with the first human in space Yuri Gagarin space became a new utopian horizon This book explores the profound repercussions of the Soviet space exploration program on culture and everyday life in Eastern Europe especially in the Soviet Union itself International Aerospace Abstracts, 1997 **Satellite** Doug Millard, 2016-11-15 Right now above our heads nearly imperceptible to us but hugely important to how we live are thousands of man made objects that we have sent into space Ubiquitous but mysterious satellites are the technological infrastructure of our globally connected world helping us do everything from orient ourselves on a map to watch our favorite television shows Yet we rarely ever think about them In this book Doug Millard pays overdue tribute to the stoic existence of the satellite tracing its simultaneous pathways through the cold silence of space and the noisy turbulence of the past century How satellites ever came to be is in itself a remarkable story Telling an astonishing history of engineering experimentation and ingenuity Millard shows how the Cold War space

race made the earliest satellites ones like Sputnik Telstar and Early Bird household names He describes how they evolved into cultural signifiers that represented not only our scientific capabilities but our capacity for imagination our ability to broaden the scope of our vision to the farthest reaches From there he follows the proliferation of satellites in the second half of the twentieth century examining their many different forms how they evolved all the things they do what they have enabled and how they have influenced our popular culture Ultimately Millard asks what we can still expect what sort of space age the satellite has initiated that is yet to be fully realized Published in association with the Science Museum London this beautifully illustrated book will appeal to any fan of space exploration and technology **Space News** Michael
