 Wipac electrical system Wipac issued two ring bound versions of this manual The first was titled Number 3 Manual and the  
 second Motorcycle Scooter Manual but unfortunately the publication dates of the individual pages were not identified  
 However based on the contents we can estimate that they were published in 1964 and 1969 approximately The later manual  
 contains considerably more information plus numerous updates to the data in the earlier manual Unfortunately some of the  
 information from the earlier manual was also omitted from the later manual as it was probably considered to be outdated  
 However as that outdated information is of significant interest to today s owners and restorers we have combined the entire  
 data from both manuals into a single publication Please note that wherever the earlier data had been updated we have only  
 included the latest update in order to prevent duplication of information This combination manual includes alternator and  
 generator testing and servicing instructions spare parts illustrations and part numbers plus Technical Data Sheets and  
 Service Bulletins that provide additional information due to model updates and or electronic equipment modifications It also  
 includes wiring diagrams by individual model type including A J S Ariel B S A Dayton Dunkley Excelsior Francis Barnett

 testing servicing maintenance overhaul and adjustment of all the major Wipac electrical components utilized by the various
