**Optimization of Complex Systems: Theory, Models, Algorithms and Applications** Hoai An Le Thi, Hoai Minh Le, Tao Pham Dinh, 2019-06-15 This book contains 112 papers selected from about 250 submissions to the 6th World Congress on Global Optimization WCGO 2019 which takes place on July 8 10 2019 at University of Lorraine Metz France The book covers both theoretical and algorithmic aspects of Nonconvex Optimization as well as its applications to modeling and solving decision problems in various domains It is composed of 10 parts each of them deals with either the theory and or methods in a branch of optimization such as Continuous optimization DC Programming and DCA Discrete optimization Network optimization Multiobjective programming Optimization under uncertainty or models and optimization methods in a specific application area including Data science Economics Finance Energy Water management Engineering systems Transportation Logistics Resource allocation Production management The researchers and practitioners working in Nonconvex Optimization and several application areas can find here many inspiring ideas and useful tools techniques for their works Optimization in Engineering Ramteen Sioshansi, Antonio J. Conejo, 2017-06-24 This textbook covers the fundamentals of optimization including linear mixed integer linear nonlinear and dynamic optimization techniques with a clear engineering focus It carefully describes classical optimization models and algorithms using an engineering problem solving perspective and emphasizes modeling issues using many real world examples related to a variety of application areas Providing an appropriate blend of practical applications and optimization theory makes the text useful to both practitioners and students and gives the reader a good sense of the power of optimization and the potential difficulties in applying optimization to modeling real world systems The book is intended for undergraduate and graduate level teaching in industrial engineering and other engineering specialties It is also of use to industry practitioners due to the inclusion of real world applications opening the door to advanced courses on both modeling and algorithm development within the industrial engineering and operations research fields **Advances in Applied Strategic Mine Planning** Roussos Dimitrakopoulos, 2018-01-17 This book presents a collection of papers on topics in the field of strategic mine planning including orebody modeling mine planning optimization and the optimization of mining complexes Elaborating on the state of the art in the field it describes the latest technologies and related research as well as the applications of a range of related technologies in diverse industrial contexts Optimization and Decision Support Systems for Supply Chains Ana Paula Barbosa Póvoa, Albert Corominas, João Luís de Miranda, 2016-09-13 This contributed volume presents a collection of materials on supply chain management including industry based case studies addressing petrochemical pharmaceutical manufacturing and reverse logistics topics Moreover the book covers sustainability issues as well as optimization approaches The target audience comprises academics industry managers and practitioners in the field of supply chain management being the book also beneficial for graduate students **Integration of Constraint Programming, Artificial Intelligence, and Operations Research** Louis-Martin

Rousseau,Kostas Stergiou,2019-05-28 This book constitutes the proceedings of the 16th International Conference on Integration of Constraint Programming Artificial Intelligence and Operations Research CPAIOR 2019 held in Thessaloniki Greece in June 2019 The 34 full papers presented together with 9 short papers were carefully reviewed and selected from 94 submissions The conference brings together interested researchers from Constraint Programming CP Artificial Intelligence AI and Operations Research OR to present new techniques or applications and to provide an opportunity for researchers in one area to learn about techniques in the others A main objective of this conference series is also to give these researchers the opportunity to show how the integration of techniques from different fields can lead to interesting results on large and complex problems
