[Visualization and Mathematics](#) Hans-Christian Hege, Konrad Polthier, 1997 Visualization and mathematics have begun a fruitful relationship establishing links between problems and solutions of both fields. In some areas of mathematics like differential geometry and numerical mathematics visualization techniques are applied with great success. However visualization methods are relying heavily on mathematical concepts. Applications of visualization in mathematical research and the use of mathematical methods in visualization have been topic of an international workshop in Berlin in June 1995. Selected contributions treat topics of particular interest in current research. Experts are reporting on their latest work giving an overview on this fascinating new area. The reader will get insight to state of the art techniques for solving visualization problems and mathematical questions.
