

# Chapter 1 System technologies

## Unit 1 General concepts (Term 1)

---

### 1 Information processing cycle

- The information processing cycle consists of input, processing, output and storage.
  - Input is data being entered into a computing device using an input device.
  - Processing is when data is being translated into something useful by the CPU and RAM.
  - Output is when information is presented to the user after processing.
  - Information and data can be stored for future use.
- Computers can communicate data and information using a communication network.

### 2 Types of computers and typical features

#### 2.1 Dedicated computers

- Dedicated computers are designed to perform a specific task rather than for general use.
- Examples include ATMs, washing machines and MP3 players.
- Computers housed in appliances or other equipment are called embedded computers.

#### 2.2 Mobile computers and devices

- Mobile computers are designed to be easily portable.
- Mobile devices include PDAs, laptops and smart phones.
- A PDA (Personal Digital Assistant) is a small touch screen device that acts as an electronic diary.
- PDAs are primarily used for appointments and reading documents.
- A smart phone is a cellular phone with functions and features normally found on computers.
- PDA features include:
  - ability to run third-party software
  - an up-to-date operating system, such as Android or Symbian
  - greater processing power than cell phones
  - more storage space than a cell phone or PDA
  - programmability
  - e-mail facilities.
- Laptop computers have the same features and functions as desktop computers, but are designed to be mobile. Features include:
  - smaller size than desktop computers
  - input and output devices are integrated into the unit
  - ability to run from battery power, as well as a power outlet.
- A tablet computer uses a touch screen interface.
- A virtual keyboard is used instead of an actual physical keyboard.
- A tablet computer can accept handwritten notes and speech input.

#### 2.3 Client/server

- This is a shortened way of saying client/server network.
- Computers that provide resources on a network are called servers.
- Computers that use resources on a network are called clients.
