**The World of Galaxies** Harold G. Corwin,Lucette Bottinelli,1989 From 12 April to 14 April 1988 120 of Gerard and

Antoinette de Vaucouleurs's friends and colleagues gathered at the Institut d'Astrophysique in Paris to celebrate Gerard's 70th birthday and his remarkable career in Astronomy. The gathering also honored the memory of Antoinette who died 29 August 1987 after a long illness and her own no less remarkable career. This volume collects the 24 invited review papers and the 60 contributed poster papers presented at the meeting Gerard de Vaucouleurs. Gerard de Vaucouleurs was born on 25 April 1918 in Paris where he spent his boyhood. He became an active amateur astronomer in the early 1930s making extensive observations of Mars, Jupiter and variable stars including the bright supernova of 1937 in IC 4182. He also began life-long interests in astronomical photography and galaxy cataloguing during this period. In 1939 he met the director of the Paris transport system and an equally avid amateur astronomer Julien Peridier. De Vaucouleurs worked at Peridier's private observatory at Le Houga in southwestern France on and off throughout the next decade. His undergraduate work was in mathematics, astronomy and experimental physics; this combined with his interest in observational astronomy formed his life-long empirical approach to science. After spending 18 months in the French army early in 1939-41, Gerard returned to the Peridier observatory and then in 1943 to his studies at the Sorbonne where he met Antoinette. **Build a Text-to-Image Generator (from Scratch)** Mark Liu, 2026-01-27. Build your own vision transformer and diffusion models for text-to-image generation from scratch. Build a Text-to-Image Generator from Scratch takes you step by step through creating your own AI models that can generate images from text. You'll explore two methods of image generation: vision transformers and diffusion models, and learn vital AI development techniques as you go. Build a Text-to-Image Generator from Scratch teaches you how to build and train models to generate high-resolution images based on text descriptions, edit an existing image based on text prompts, build and train a model to add captions to images, build and train a vision transformer to classify images, fine-tune LLMs for downstream tasks such as classification, text or image generation, better differentiate real images from deepfakes. Build a Text-to-Image Generator from Scratch dives into the powerful models behind AI image generators like DALL-E and Stable Diffusion. We believe that the best way to learn is to build something from scratch, so in this book you'll build your very own diffusion model and vision transformer. As you work through each stage of development, you'll develop an understanding of how these models can be customized, applied and integrated for impressive multimodal AI. About the book: Build a Text-to-Image Generator from Scratch guides you through creating AI models that can generate amazing images from simple text prompts. You'll explore two distinct methods: learning how transformers turn images into sequences of patches and how diffusion models refine noise into coherent images. Author Mark Liu explains each stage with clear text diagrams and examples. You'll develop models that can classify images automatically, add image captions, reconstruct images and deliver high-resolution content. By the time you're done, you'll have a deep understanding of how image generation AI works and the satisfaction of building your text-to-image models. About the reader: For machine learning enthusiasts and data scientists with intermediate Python skills. About the author: Mark Liu is the
