

Unit 9 Study Guide and Exercises

Directions: After you have read Unit 9 you should be able to tackle the following questions to test your understanding of the main ideas raised in the unit.

1. You should understand these terms and concepts from this unit:

sense
analytic sentences
set of sufficient conditions
sense properties of sentences

synthetic sentences
contradiction
necessary condition
stereotype (feature)

2. Assume that John is the same person in each of the following sentences. Now, if the sentence *John is a bachelor* is true, then is it true or false that

- a. John is male.
b. John is unmarried.

- c. John is human.
d. John is adult.

All of (2a-d) are true, according to the intuitions of a typical native speaker, though 2d might be open to debate, depending on how *adult* is defined.

We can say that the sentence *John is a bachelor* entails (a-d), because the truth of (a-d) necessarily follows from the proposition contained in the sentence *John is a bachelor*. The notion of entailment will be explored in greater detail in Unit 10.

For questions 3-7 indicate whether each sentence is **analytic**, **synthetic**, or a **contradiction**. If you are not sure about a sentence, try to explain why it is not a clear-cut case.

3. a. All bachelors are unmarried.
b. All bachelors are happy.
c. All bachelors are married.

Analytic
Synthetic
Contradiction

Identification of the items in 3 seems reasonably clear-cut.

4. a. All misers are stingy.
b. All misers are rich.
c. All misers waste money.
d. All misers are miserable.

Analytic (?)
Synthetic (?)
Contradiction (?)
Synthetic (?)

The items in 4 are more problematic. The suggested answers are based on most native speakers' intuitions about the meaning of *miser*, but are open to debate.

5. a. All carnivores eat meat.
b. All mammals produce live young.

Analytic (?)
Analytic (?)

The items in 5 are also problematic. Pandas are classed by zoologists as carnivores, but they only eat bamboo. Yet most animals classed as carnivores do eat meat. Nearly all mammals do produce live young, and yet the platypus lays eggs. Interpreting these sentences as analytic seems to be based on naïve speaker knowledge rather than expert knowledge.
