*The Active/Ethical Professional* Michael G. Gunzenhauser, 2012-03-08 A winner of the 2012 Critics Choice Book Award of the American Educational Studies Association AESA The Active Ethical Professional proposes an ethical framework for educators and school leaders who find their practice constrained by the demands of policies and structures created in response to accountability legislation The framework is derived from Michel Foucault's theories of discipline surveillance resistance and care of the self Gunzenhauser asserts that an educator's dual position of being normalized especially in relations with those above them in the education hierarchy and normalizing especially in relations with their students can be troubling and difficult The book argues that this position requires educators to be both ethical and active To be ethical educators not only need to resolve ethical dilemmas in defensible ways but they also need to recognize themselves as powerful in relation to others To be active educators need to be vigilant for moments when they are placed in the position to be reactive to normalizing pressures and they also need to develop clear notions of how they may create opportunities for the cultivation of educational selves that are rich ethically aesthetically epistemologically and politically *Resources in Education*, 1989 **The Oklahoma Teacher**, 1944 Library Media Connection, 2000 **Who's who in American Education**, 1992 **Illinois Education**, 1923 Science Books & Films, 1987 *Shelton, Wininger, and Pace Families* Alvin Harold Casey, Robert Brooks Casey, 1988 Descendants of John Shelton born in late 1700's He married Catherine Messer in 1805 in Hawkins County Tennessee *Public Schools USA* Charles Hampton Harrison, 1988 The first edition of Harrison's guide was published in 1988 Statistical profiles for most of the 404 school districts in 41 major metropolitan areas are included in this updated edition which also expands the number of statistics from 22 to 27 making it even easier for parents business executives real estate agents educators and other interested readers to compare one district's vital statistics with another district's data within a single metropolitan area or between metropolitan areas Annotation copyrighted by Book News Inc Portland OR **No Good Alternative** William T. Vollmann, 2018-06-05 The most honest book about climate change yet The Atlantic The Infinite Jest of climate books The Baffler An eye opening look at the consequences of coal mining and oil and natural gas production the second of a two volume work by award winning author William T Vollmann on the ideologies of energy production and the causes of climate change The second volume of William T Vollmann's epic book about the factors and human actions that have led to global warming begins in the coal fields of West Virginia and Eastern Kentucky where America's best friend is not merely a fuel but a heritage Over the course of four years Vollmann finds hollowed out towns with coal polluted streams and acidified drinking water makes covert visits to mountaintop removal mines and offers documented accounts of unpaid fines for federal health and safety violations and of miners who died because their bosses cut corners to make more money To write about natural gas Vollmann journeys to Greeley Colorado where he interviews anti fracking activists a city planner and a homeowner with serious health issues from fracking Turning

to oil production he speaks with among others the former CEO of Conoco and a vice president of the Bank of Oklahoma in charge of energy loans and conducts furtive roadside interviews of guest workers performing oil related contract labor in the United Arab Emirates As with its predecessor No Immediate Danger this volume seeks to understand and listen not to lay blame except in a few corporate and political cases where outrage is clearly due Vollmann is a carbon burner just like the rest of us he describes and quantifies his own power use then looks around him trying to explain to the future why it was that we went against scientific consensus continually increasing the demand for electric power and insisting that we had no good alternative
