	SOLIDS	 https://m.youtube.com/watch?v=skphKqPo5Wk
INTRODUCTION	- In term 1 in Grade 10 learners have done several geometric constructions of various polygons. - Learners will be introduced to various right regular solids. - In grade 10 learners completed various types of solids. - In this lesson we will continue to do a sectioning of various pyramids and prisms. - We will also need to draw a true shape of the cutting plane.	
CONCEPTS AND SKILLS	When giving a question to complete: Learners will usually start with the following. - Draw the top view and project the front view as well as the left and/or right view using construction lines. Determine the cut surface according to the section line. - Complete the views by darkening the applicable lines. - Insert the hatching. Determine the visibility and insert the hidden detail. - Project the true shape of the section. Label the true shape of the section. When drawing section lines, the following must be adhered to: - A section line represents a cutting plane. - A section line is drawn using a chain line with thickened dark ends. - The section line must extend past the outlines of the view on which it is drawn. - The section line must be labelled. The solids question will be covered in paper 1.
