

EGG DROP

You'll need

Boiled eggs
Selection of items to wrap the eggs in: bubble wrap, cardboard, paper
Tape
Sealable sandwich bag - optional

Instructions

There are lots of different ways to do an egg drop experiment.

If you want to keep it almost mess free, half fill a sandwich bag with cotton wool, bubble wrap or even rice/pasta and place a boiled egg in the centre.

Hold the bag at the top as high as you can reach and drop the bag.

Check the egg for damage.

Repeat for each material, if the egg cracks use a new egg for the next test.

Another idea is wrap the egg in the test material and tape it together.

REMEMBER - drop each egg from the same height and try to use a similar amount of each test material

Challenge

Investigate to find the smallest amount of protective material you can use to keep the egg safe.

What happens if you drop the egg from a greater height?

Science Sparks TM

Adult supervision required. You are responsible for your own safety.

Physical Theory as Logico-Operational Structure C.A. Hooker, 2012-12-06 In two earlier volumes entitled *The Logico Algebraic Approach to Quantum Mechanics* hereafter LAA I II I have presented collections of research papers which trace out the historical development and contemporary flowering of a particular approach to physical theory One might characterise this approach as the extraction of an abstract logico algebraic skeleton from each physical theory and the reconstruction of the physical theory as construction of mathematical and interpretive flesh e.g. measures operators mappings etc on this skeleton The idea is to show how the specific features of a theory that are easily seen in application e.g. interference among observables in quantum mechanics arise out of the character of its core abstract structure In this fashion both the deeper nature of a theory e.g. in what precise sense quantum mechanics is strongly statistical and the deeper differences between theories e.g. classical mechanics though also a mechanics is not strongly statistical are penetratingly illuminated What I would describe as the mainstream logico algebraic tradition is captured in these two collections of papers

LAA I II The abstract structural approach to the characterisation of physical theory has been the basis of a striking transformation in this century in the understanding of theories in mathematical physics There has emerged clearly the idea that physical theories are most significantly characterised by their abstract structural components Welsh as a specific subject for elementary schools, compiled by a committee of elementary school teachers.
