

M2L2: Earthquake 2 – Determination of Epicenter - Honors

Activity:

Locating the epicenter

Get the Gizmo ready:

- Click **Reset** (↺).
- Click **Play**, and then click **Pause** when the seismograms are complete.

Goal: Based on three seismograms, locate the epicenter of an earthquake.

Prepare: To complete this activity, you will need the table and graph you made in the *Earthquakes 1 – Recording Station* Student Exploration. Take this out now. If you do not have it, there is a graph you can use at the end of this report.

Measure: Turn on **Show time probe**. On each seismogram, locate the first P-wave and the first S-wave. Measure the time interval (Δt) for each seismogram, and then use your graph to find the distance of each station to the epicenter.

Use the graph provided on the last page of this report to determine the distances.

Station	Time interval (Δt)	Distance to epicenter (km)
A	62sec	483
B	106	826
C	48	374

Locate: Turn on the **Show station A** checkbox. Set the **Radius** to the distance of station A from the epicenter, based on your table above. Look on the circle on the map.

Where could the epicenter be located? Where all the circles intersect

Locate: Turn on the **Show station B** checkbox. Set the **Radius** to the distance of station B from the epicenter. Look on the two circles on the map.

Which two places could the epicenter be located now?

Where A and B intersect

Locate: Turn on the **Show station C** checkbox. Set the **Radius** to the distance of station C from the epicenter. If you did everything right, you should see the epicenter symbol (⊕). If you do not, recheck all of your distances. (You may need to adjust each radius slightly.)

Relative to the three circles, where is the epicenter located?

close to the intersection of all three circles

Once you locate the epicenter, click the **Tools** palette and click **Screen shot** and insert the picture into the space below.

Right-click the image, choose "Copy Image," and paste the image into the space below. Be sure the screenshots are large (expand them inside each cell), so that it can be easily read when you hand this report in.
