Fires to Oceans: Dynamics of Fire-Derived Organic Matter in Terrestrial and Aquatic Ecosystems Samuel Abiven,Cristina
Santín,2019-05-09 Fire derived organic matter also known as pyrogenic carbon PyC is ubiquitous on Earth It can be found in
soils sediments water and air In this wide range of environments fire derived organic matter represents a key component of
the organic matter pool and in many cases the largest identifiable group of organic compounds PyC is also one of the most
persistent organic matter fractions in the ecosystems and its study is therefore particularly relevant for the global carbon
cycle From its production during vegetation fires to its transfer into soils sediments and waters PyC goes through different
transformations both abiotic and biotic Contrary to early assumptions PyC is not inert and interacts strongly with the
environment evidence of microbial decomposition oxidation patterns and interactions with minerals have been described in
different matrices PyC travels across these different environments and it is modified chemically and physically but remains
persistent This Research Topic explores important questions in our understanding of fire derived organic matter from the
characterization and quantification of PyC components to the transformation and mobilization processes taking place on
terrestrial and aquatic ecosystems The studies compiled here provide novel and often unexpected results They all answer
some of the questions posed and more importantly provide scope for many more *The Soils of Nepal* Roshan Babu
Ojha,Dinesh Panday,2021-10-14 This book publishes consolidated information on the soils of Nepal from all possible sources
The Survey Department Government of Nepal conducted two national scale soil survey projects to classify soils of Nepal Land
Resource Mapping Project ended in 1985 and National Land Use Planning Project ended in 2021 Both projects adopted the
United States Department of Agriculture system of soil classification Besides National Soil Science Research Center
previously known as Soil Science Division of Nepal Agricultural Research Council and Soil Management Directorate
Department of Agriculture also worked on soils of Nepal To date the information on the soils of Nepal is not published in well

documented form but has been reported widely as gray literature project report or government report or peer review articles The Soils of Nepal is a part of World Soils Book Series which constitutes twelve chapters covering broad aspects such as soil research history climate geology soil classification and mapping and soil fertility Furthermore information about soil properties and relation between soil constituents of the dominant soil types of Nepal and their scope of use in the context of land use are described This book also tries to simplify the intricate relationship among soil culture and people Each chapter contains a comprehensive richly illustrated and up to date overview of the soils of Nepal We believe it fulfils a quest for a global audience including students educators extension workers and soil scientists who are interested to know the young soils of Nepal
