Levin, Lynne Schrum, 2015-04-25 This timely book shows how award winning secondary schools and districts are successfully using technology and making systemic changes to increase student engagement improve achievement and re invigorate the teaching and learning process Through in depth case studies we see how experienced school and district leaders use technology in curricular administrative and analytical ways to meet the needs of 21st century learners educators and communities These cases reveal important details addressed by the leadership of these schools and districts that go beyond what they did with technology to include changes in school culture curriculum and teaching uses of assessment data financial considerations infrastructure and involvement with the community Book Features Successful models from schools districts experienced with using technology as a lever for school improvement Case studies from diverse schools districts across the country that show what works and how it works A cross case analysis that makes it easy to compare individual schools and identify common practices Barbara B Levin is a Professor in the Department of Teacher Education and Higher Education and Director of the Teachers Academy at the University of North Carolina at Greensboro Lynne Schrum is Dean College of Education and Human Services West Virginia University Barbara B Levin and Lynne Schrum offer their readers the distinct advantage of compressing into a single volume what it took me decades to learn They not only present the big ideas of effective school leadership but bring them alive through case studies that illustrate how those ideas manifest themselves in leaders day to day behaviors I encourage you to use the ideas and practices you find here to leverage technology to create schools in which all students and adults thrive From the Foreword by Dennis

Sparks Emeritus Executive Director National Staff Development Council Learning Forward Prepublication Reviews In Leading Technology Rich Schools the authors present a fascinating and exciting set of case studies that provide great insight into the ways leaders can support high level innovation in schools Importantly their focus is on technology that enhances learning and teaching rather than technology as an expensive school ornament A must read for those who study and practice educational leadership Jeffrey S Brooks Associate Professor and Educational Leadership Program Coordinator School of Education Iowa State University author of Black School White School Racism and Educational Mis leadership This book is a precious gift for the vast majority of administrators who desperately need concrete examples of how to create facilitate and sustain technology infused learning environments Scott McLeod Associate Professor and Founding Director CASTLE University of Kentucky These rich illustrations of technology leadership in secondary schools show how a number of complex variables must come together to produce the key outcome of positioning educational technology as a support to teaching and learning Examples of leadership practices that coordinate team members for interdependent work and invite teachers involvement should prove to be a valuable resource to practitioners and also provide insight to policymakers for how they can create supportive conditions for such work Sara Dexter Associate Professor Department of Leadership Foundations and Policy Curry School of Education University of Virginia Leading Technology Rich Schools is a key advance in understanding how technology can best be integrated in today s schools These case studies of effective practice are sure to become required reading for those in leadership positions who are using technology for school improvement Glen L Bull Samuel Braley Gray Professor of Education Curry School of Education University of Virginia The rubber meets the road in this well researched book with detailed stories of exemplary schools and school leaders that have leveraged technology as a key tool to make significant reforms stick Through these vivid case studies Levin and Schrum illuminate a dynamic and complex set of lessons learned to help all school leaders undertake transformations of their schools L Michael Golden CEO Educurious

Brain-powered Science Thomas O'Brien, 2010 How can a long metal needle pass through a balloon without popping it How can water flow at very different rates through two identical funnels How can a stick placed on a table under several sheets of newspaper and extended over the edge of a table snap when quickly struck without lifting or tearing the paper Author Thomas O'Brien takes these and 30 more science inquiry activities to a higher level in this book for educators who love to surprise and challenge their students with unanticipated results Using experiments based on the science of a discrepant event an experiment or demonstration in which the outcome is not what students expect O'Brien shows how learners can be motivated to reconsider their preconceived notions and think more closely about what has actually occurred and the underlying scientific explanations What makes this volume more valuable than a mere activity book is the addition of a science education component to the extensive science content found in each activity Each discrepant event is shown to be analogous to a pedagogical principle Speaking directly to teachers O'Brien writes Your participation as teacher as learner

experimenter rather than simply passive reader in these minds on activities will lead you to question and help you to revise your implicit assumptions about the nature of science teaching and learning At the same time you will develop expertise with activities that you can use with your own students The dual purpose activities thus allow you to unlock two doors with one key the doors to your own learning and to your students learning The detailed analogies between the activities and science learning make the book an ideal resource for middle and high school teachers science teacher educators and their preservice students and professional development specialists alike This thorough and thought provoking text includes more than 200 up to date internet resources as well as extensions to each of the physical science biology and chemistry activities bringing the total number of inquiry activities to nearly 120 Most important the author reminds teachers that the study of science is full of surprises and should be both meaningful and fun for students *Teaching Science* ,2006 **The Encyclopedia of Clinical**
