Creativity in Research Nicola Ulibarri, Amanda E. Cravens, Anja Svetina Nabergoj, Sebastian Kernbach, Adam Royalty, 2019-08-01 Creativity is at the heart of successful research yet researchers are rarely taught how to manage their creative process and modern academic life is not structured to optimize creativity Creativity in Research provides concrete guidance on developing creativity for anyone doing or mentoring research Based on a curriculum developed at Stanford University s Hasso Plattner Institute of Design this book presents key abilities that underlie creative research practice through a combination of scientific literature on creative confidence experiential exercises and guided reflection By focusing attention on how research happens as well as its outputs researchers increase their ability to address research challenges and produce the outputs they care about Simultaneously they may also transform their emotional relationship with their work replacing stress and a harsh inner critic with a more open and emotionally empowered attitude

Design Thinking Research Larry Leifer, Hasso Plattner, Christoph Meinel, 2013-09-03 This book summarizes the results of Design Thinking Research carried out at Stanford University in Palo Alto California USA and Hasso Plattner Institute in Potsdam Germany The authors offer readers a closer look at Design

Thinking with its processes of innovations and methods The contents of the articles range from how to design ideas methods and technologies via creativity experiments and wicked problem solutions to creative collaboration in the real world and the connectivity of designers and engineers But the topics go beyond this in their detailed exploration of design thinking and its use in IT systems engineering fields and even from a management perspective The authors show how these methods and strategies work in companies introduce new technologies and their functions and demonstrate how Design Thinking can influence as diverse a topic area as marriage Furthermore we see how special design thinking use functions in solving wicked problems in complex fields Thinking and creating innovations are basically and inherently human so is Design Thinking Due to this Design Thinking is not only a factual matter or a result of special courses nor of being gifted or trained it is a way of dealing with our environment and improving techniques technologies and life

Costumers at Work: The Collaborative Creativity, Emotional Labour, and Technical Skill of Costume Creation Madeline Taylor,2025-06-23
Costumers at Work The Collaborative Creativity Emotional Labour and Technical Skill of Costume Creation explores the various forms of work carried out in the costume workshop by the myriads of skilled professionals who transform ideas and sketches into the wearable costumes seen on stage Costume work as collective collaborative and material labour produced by a predominantly female workforce has been long overlooked by the performance industry and those who study it This book exposes the inherent tensions between theatre s strict hierarchies and collaborative ideology and how these inform the structures negotiated day to day by costumers as they carry out their work Through close attention to their work the book establishes costumers work as collaborative and complex a creative and emotional labour that contributes to enhanced storytelling actor performance and audience experience Using extensive ethnographic observation conducted over 14 months at three professional theatre costume workshops around Australia combined with extant interviews and research from across the globe Costumers at Work provides explicit theories and guidance about the behaviours skills and communication modes that make costume collaboration more effective and enjoyable This book is written for costume researchers practitioners and students of theatrical costume design and construction along with theatre scholars broadly

advanced applications of the methods discussed and future interdisciplinary collaborations

Experimental Design Research Philip Cash, Tino Stanković, Mario Štorga, 2016-05-17 This book presents a new multidisciplinary perspective on and paradigm for integrative experimental design research It addresses various perspectives on methods analysis and overall research approach and how they can be synthesized to advance understanding of design It explores the foundations of experimental approaches and their utility in this domain and brings together analytical approaches to promote an integrated understanding The book also investigates where these approaches lead to and how they link design research more fully with other disciplines e g psychology cognition sociology computer science management Above all the book emphasizes the integrative nature of design research in terms of the methods theories and units of study from the individual to the organizational level Although this approach offers many advantages it has inherently led to a situation in current research practice where methods are diverging and integration between individual team and organizational understanding is becoming increasingly tenuous calling for a multidisciplinary and transdisciplinary perspective Experimental design research thus offers a powerful tool and platform for resolving these challenges Providing an invaluable resource for the design research community this book paves the way for the next generation of researchers in the field by bridging methods and methodology As such it will especially benefit postgraduate students and researchers in design research as well as engineering designers

Design Thinking Research Christoph Meinel, Larry Leifer, 2021-03-26 Extensive research conducted by the Hasso Plattner Design Thinking Research Program at Stanford University in Palo Alto California USA and the Hasso Plattner Institute in Potsdam Germany has yielded valuable insights on why and how design thinking works The participating researchers have identified metrics developed models and conducted studies which are featured in this book and in the previous volumes of this series This volume provides readers with tools to bridge the gap between research and practice in design thinking with varied real world examples Several different approaches to design thinking are presented in this volume Acquired frameworks are leveraged to understand design thinking team dynamics The contributing authors lead the reader through new approaches and application fields and show that design thinking can tap the potential of digital technologies in a human centered way In a final section new ideas in neurodesign at Stanford University and at Hasso Plattner Institute in Potsdam are elaborated upon thereby challenging the reader to consider newly developed methodologies and provide discussion of how these insights can be applied to various sectors Special emphasis is placed on understanding the mechanisms underlying design thinking at the individual and team levels Design thinking can be learned It has a methodology that can be observed across multiple settings and accordingly the reader can adopt new frameworks to modify and update existing practice The research outcomes compiled in this book are intended to inform and provide inspiration for all those seeking to drive innovation be they experienced design thinkers or newcomers

Challenging Future Practice Possibilities Joy Higgs, Steven Cork, Debbie Horsfall, 2019-03-25 What might the futures of practice be like is far from a

straightforward question Emphasising the before the word future implies one future But futures thinkers have identified a range of futures that people think about In this book we reflect on possible probable and preferable futures in relation to practice and work Readers are invited to consider how their own engagement in shaping possible futures will support ways of working that they deem preferable even those they can hardly imagine Challenging Future Practice Possibilities also examines influences that are maintaining the status quo and others that are pushing interest driven change Authors consider the major challenges that practice and practitioners face today such as wicked problems fears for the future and complex demands and opportunities posed by the digital revolution A number of examples of future oriented work directions such as protean careers and artificial intelligence enhancing or even replacing human workforces are considered along with concerns like the vulnerability of many work situations and workers In some cases workers and employers alike are unprepared for these challenges while others see adapting to these situations as yet another pathway of practice futures evolution

Design Thinking Hasso Plattner, Christoph Meinel, Larry Leifer, 2010-12-13 Everybody loves an innovation an idea that sells But how do we arrive at such ideas that sell And is it possible to learn how to become an innovator Over the years Design Thinking a program originally developed in the engineering department of Stanford University and offered by the two D schools at the Hasso Plattner Institutes in Stanford and in Potsdam has proved to be really successful in educating innovators It blends an end user focus with multidisciplinary collaboration and iterative improvement to produce innovative products systems and services Design Thinking creates a vibrant interactive environment that promotes learning through rapid conceptual prototyping In 2008 the HPI Stanford Design Thinking Research Program was initiated a venture that encourages multidisciplinary teams to investigate various phenomena of innovation in its technical business and human aspects The researchers are guided by two general questions 1 What are people really thinking and doing when they are engaged in creative design innovation How can new frameworks tools systems and methods augment capture and reuse successful practices 2 What is the impact on technology business and human performance when design thinking is practiced How do the tools systems and methods really work to get the innovation you want when you want it How do they fail In this book the researchers take a system s view that begins with a demand for deep evidence based understanding of design thinking phenomena They continue with an exploration of tools which can help improve the adaptive expertise needed for design thinking The final part of the book concerns design thinking in information technology and its relevance for business process modeling and agile software development i e real world creation and deployment of products services and enterprise systems

Design Thinking Research Christoph Meinel, Larry Leifer, 2020 The practice of design thinking has gained in prominence over the past several years and an increasing number of people and institutions have experienced its innovative power However as a result of this success story the term has also evolved into something of an overused or even misused buzzword The demand for an in depth evidence based understanding of the way design thinking works has grown

accordingly This challenge is addressed by the Hasso Plattner Design Thinking Research Program Summarizing the outcomes of the program s 10th year this book shares the scientific insights gained by researchers at the Hasso Plattner Institute in Potsdam and Stanford University in California in the course of their investigations experiments and studies Special emphasis is placed on exploring new approaches to design thinking education making headway on the goals of the research program namely to fuel creativity and establish improved content for the teaching and learning of design thinking This volume also presents a broad range of findings on effective team interaction Moreover researchers present their findings on tools that support design thinking practices and showcase concrete applications The results of this rigorous academic research are not only intended to benefit the scientific community but will hopefully find their way to many other readers seeking to support innovation through collaboration be it in businesses or in society *Journal of Mechanical Design* ,2007-07 Design Thinking Research Hasso Plattner,Christoph Meinel,Larry Leifer,2015-09-08 This book summarizes the results of Design Thinking Research carried out at Stanford University in Palo Alto California USA and Hasso Plattner Institute in Potsdam Germany The authors offer readers a closer look at Design Thinking with its processes of innovations and methods The contents of the articles range from how to design ideas methods and technologies via creativity experiments and wicked problem solutions to creative collaboration in the real world and the connectivity of designers and engineers But the topics go beyond this in their detailed exploration of design thinking and its use in IT systems engineering fields and even from a management perspective The authors show how these methods and strategies work in companies introduce new technologies and their functions and demonstrate how Design Thinking can influence as diverse a topic area as marriage Furthermore we see how special design thinking use functions in solving wicked problems in complex fields Thinking and creating innovations are basically and inherently human so is Design Thinking Due to this Design Thinking is not only a factual matter or a result of special courses nor of being gifted or trained it s a way of dealing with our environment and improving techniques technologies and life **Design Thinking Research** Hasso Plattner,Christoph Meinel,Larry Leifer,2014-07-16 Design thinking as a user centric innovation method has become more and more widespread during the past years An increasing number of people and institutions have experienced its innovative power While at the same time the demand has grown for a deep evidence based understanding of the way design thinking functions This challenge is addressed by the Design Thinking Research Program between Stanford University Palo Alto USA and Hasso Plattner Institute Potsdam Germany Summarizing the outcomes of the 5th program year this book imparts the scientific findings gained by the researchers through their investigations experiments and studies The method of design thinking works when applied with diligence and insight With this book and the underlying research projects we aim to understand the innovation process of design thinking and the people behind it The contributions ultimately center on the issue of building innovators The focus of the investigation is on what people are doing and thinking when engaged in creative design

innovation and how their innovation work can be supported Therefore within three topic areas various frameworks methodologies mind sets systems and tools are explored and further developed The book begins with an assessment of crucial factors for innovators such as empathy and creativity the second part addresses the improvement of team collaboration and finally we turn to specific tools and approaches which ensure information transfer during the design process All in all the contributions shed light and show deeper insights how to support the work of design teams in order to systematically and successfully develop innovations and design progressive solutions for tomorrow

Understanding the Implementation of Office Technology Tora K. Bikson,1987 This Note which originally appeared in *Technology and the Transformation of White Collar Work* Chapter 9 Lawrence Erlbaum Associates Inc 1987 considers the factors that lead to the successful introduction of new office technology in an organization It is based on a survey of 55 work groups using advanced office technology in 26 organizations Success includes the extent to which the technology is used the users satisfaction with it and with the jobs they perform using it and improvements in organizational performance Features of the organization itself features of the technology and the way the technology is introduced into the organization all play a role For example work groups in which the implementation used a balanced social and technical approach and encouraged worker participation in the introduction process all had more successful implementations The Note concludes with observations about areas where technology implementation process and research all need improvement Rand abstract
