Patricia Drew, 2020-03-01 Breasts are integral to mothers bodies over the life course they can swell droop be judged be aroused lactate be altered be removed A woman s own breasts may be foremost in her mind during some life events only to recede into the background at other times Breasts are complex they are enveloped by larger cultural meanings that go far beyond their mammary gland function and we cannot fully understand breasts without examining the myriad discourses surrounding them Social policies cultural norms and interpersonal interactions all help construct localized breast discourses which in turn shape mothers breast experiences Through examining commonalities and differences over the lifespan we can see that women s breast experiences inform us about the social conditions in which women live their lives
