the 19th century although it was not until the first decades of the 20th century that the idea of a topological space was developed By the middle of the 20th century topology had become a major branch of mathematics The motivating insight behind topology is that some geometric problems depend not on the exact shape of the objects involved but rather on the way they are put together For example the square and the circle have many properties in common they are both one dimensional objects from a topological point of view and both separate the plane into two parts the part inside and the part outside
