

6 Timing belt - replacement

Refer to illustrations 6.6a, 6.6b, 6.7a, 6.7b, 6.7c, 6.7d, 6.8 and 6.9

CAUTION:

Because this is an "interference" engine design, if the timing belt has broken there will be damage to the valves (and possibly the pistons) and will require removal of the cylinder heads.

Note: Because of work necessary to get at the timing belt and replace it, and because the water pump is driven by the timing belt, it is recommended that the water pump be replaced at the same time as the belt (see Chapter 3). The factory recommends replacing the timing belt at 100,000 miles.

1. Disconnect the cable from the negative terminal of the battery (see Chapter 5, Section 1).
2. Remove the cooling fan assembly (see Chapter 3) and the accessory drivebelt (see Chapter 1).
3. Remove the valve covers (see Section 4) and loosen the rocker

arm shaft bolts (see Section 5).

4. Raise the vehicle and support it securely on jackstands. Remove the crankshaft pulley (see Section 11) and the drivebelt tensioner (see Section 1).

5. Remove the power steering pump mounting bolts and position the power steering pump off to the side without disconnecting the power steering system fluid lines (see Chapter 10).

6. Remove the lower timing belt cover and the upper timing belt cover from the cylinder heads (see illustrations). If the same belt is to be reinstalled, mark the direction of rotation on the belt using white paint.

7. Temporarily install the crankshaft pulley bolt and turn the crankshaft with the bolt to align the timing marks on the crankshaft and camshaft sprockets. The crankshaft sprocket arrow should line up with the TDC indicator on the oil pump cover and the camshaft sprocket marks should line up with the marks on the top of the rear covers (see illustrations).

8. Unbolt the timing belt tensioner and remove the belt (see illustration).

6.6a Location of the lower timing belt cover mounting fasteners

6.6b Location of the upper timing belt mounting fasteners

6.7a Rotate the crankshaft until the pointer on the crankshaft sprocket aligns with the TDC mark on the oil pump cover . . .

6.7b . . . the right camshaft sprocket timing mark aligns with the mark on the rear cover . . .

6.7c . . . and the left camshaft sprocket timing mark aligns with the mark on the rear cover

Chiltons Timing Belt Manual
