Backpackers Guide To Oz:

A Backpacker's Guide to Making Every Ounce Count Steven Lowe, 2015-05-19 A Backpacker's Guide to Making Every Ounce Count was written by an avid outdoorsman for those interested in knowing how a Gram Weenie thinks. If you are interested in lightening your pack a few ounces at a time, this book covers that very subject. Steven Lowe discusses how he used to pack for a trip and how he learned from the so-called experts. After following their advice, he ended up with a very heavy pack and soon realized that there had to be a lighter way to backpack. A Backpacker's Guide to Making Every Ounce Count offers tips that may allow you to approach your pack from a different point of view, like cutting the tags from your clothes and cutting your toothbrush in half, all in the name of shaving a few ounces of weight. When planning a trip, you need to look at your gear and ask questions like, "How many ounces can I shave from this item?" This book offers some ideas on how to lighten a few ounces from any pack, reduce the weight on your Big Three, and help you define just what type of backpacker you are: a lightweight or an ultra lightweight backpacker. There are sixteen ounces in a pound. If you can shave four ounces from four areas in your pack, you just shaved one pound from your pack. Every ounce truly does count.
