## X200A

### 2m/70cm Dual Band High Performance Gain Base Station Antenna

#### Description

1. Linear Phase Shifter technology permits the antenna to achieve high performance, high power rating, low vswr, and broader band coverage on both 2m and 70cm bands.
2. Direct element joint structure with two interconnected FRP outer-shells. Enables the antenna to maintain the same strength as one with one piece structure. The ring gasket makes the antenna water-proof, and therefore maintains performance even in rainy weather. When required, the antenna can be easily assembled or disassembled by adjusting the joint bracket accordingly.
3. Professional quality maximum wind resistance is achieved by the rugged structure. Superior water-proofing eliminates unstable VSWR that might otherwise happen in climatic weather. This antenna may also be used in seaside or contaminated air environments as it is rust and corrosion free.
4. Both of the bands, 2m and 70cm, can be operated simultaneously by using optional antenna duplexer.
5. DC ground structure, which escapes high voltage caused by lightning, protects your radio and equipment.
