# Debating brain drain: May governments restrict emigration?

Gillian Brock and Michael Blake

Oxford University Press, Oxford, 2015, 304pp., ISBN: 978-0199315628

*Contemporary Political Theory* (2016) **15**, e36–e39. doi:10.1057/cpt.2016.5;  
advance online publication 23 February 2016

Many developing states lose their highest skilled citizens to developed states; the problem is particularly acute in the medical field, but it is also true across skilled fields, including engineering, information technology, and so on. As a result, developing states are struggling to create and sustain political and economic institutions. Taking these facts largely for granted, although to differing degrees, Gillian Brock and Michael Blake consider what tools developing states possess to mitigate 'brain drain'. In Part 1 of *Debating Brain Drain*, Brock proposes that developing states may coercively restrain citizens from exiting; in Part 2 of the book Blake resists this claim. In Parts 3 and 4, Brock and Blake engage with each other more directly. Although the introduction to the book suggests significant disagreement, in fact both Brock and Blake are willing to accept that developing states can restrict the exit of some citizens in some, highly constrained, cases.

Both Brock and Blake agree that the global environment is riddled with inequalities, which are created, sustained and perpetuated by wealthy states; as a result, citizens of many poor countries are unjustly consigned to abject poverty, in states which possess limited resources – materially, institutionally – to do much about that poverty. Both agree that a commitment to a core 'liberal intuition' – 'that persons, all of them, are alike in moral dignity and must be treated as such by the institutions that shape their lives' (Introduction, p. 4) – readily serves as a critique of the global environment as it is now structured. Where they purport to differ is with respect to the tools possessed by *developing* states to respond to the exit of skilled migrants, who demand the right to practice their profession outside of their country of origin.

In Part 1, Brock surveys the possible options available to developing states, in the face of brain drain, and proposes that they have two justifiable options. Developing states may tax their citizens, either via an exit tax or via ongoing income taxation schemes. These taxation schemes may not impose unreasonable burdens on emigrants, and they must 'respect the[ir] core concerns and interests', as well as the concerns and

Theorists concerned about the distributive effects of skilled emigration brain drain often argue that its harmful effects can be justly mitigated by restricting emigration from sending countries or by limiting immigration opportunities to receiving countries I raise moral and practical concerns against restricting the movement of skilled migrants and contend that conceptualizing the moral issue in these terms leads theorists to neglect the moral salience of institutions that determine the distributive effects of migration Using an analogy to skilled migration in a domestic context I argue for locating brain drain in a more holistic institutional context that includes the reform of global institutions and of policies affecting migration
