- How do biologists make a karyotype? \_\_\_\_\_  
 \_\_\_\_\_  
 \_\_\_\_\_
- Circle the letter of each sentence that is true about human chromosomes.

  - ☐ Males have two X chromosomes.
  - ☐ Autosomes are all the chromosomes, except the sex chromosomes.
  - ☐ Biologists would write 46,XY to indicate a human female.
- Complete the Punnett square below to show how the sex chromosomes segregate during meiosis.

**The Sceptical Optimist** Nicholas Agar, 2015-07-09 The rapid developments in technologies especially computing and the advent of many smart devices as well as rapid and perpetual communication via the Internet has led to a frequently voiced view which Nicholas Agar describes as radical optimism Radical optimists claim that accelerating technical progress will soon end poverty disease and ignorance and improve our happiness and well being Agar disputes the claim that technological progress will automatically produce great improvements in subjective well being He argues that radical optimism assigns to technological progress an undeserved pre eminence among all the goals pursued by our civilization Instead Agar uses the most recent psychological studies about human perceptions of well being to create a realistic model of the impact technology will have Although he accepts that technological advance does produce benefits he insists that these are significantly less than those proposed by the radical optimists and aspects of such progress can also pose a threat to values such as social justice and our relationship with nature while problems such as poverty cannot be understood in technological terms He concludes by arguing that a more realistic assessment of the benefits that technological advance can bring will allow us to better manage its risks in future
