Quantum Mechanics David H. McIntyre, Corinne A. Manogue, Janet Tate, 2012 This innovative new text presents quantum mechanics in a manner that directly reflects the methods used in modern physics research making the material more approachable and preparing students more thoroughly for real research Most texts in this area start with a bit of history and then move directly to wave particle problems with accompanying heavy mathematical analysis Quantum Mechanics provides a foundation in experimental phenomena and uses a more approachable less intimidating more powerful mathematical matrix model Beginning with the Stern Gerlach experiments and the discussion of spin measurements and using bra ket notation the authors introduce an important notational system that is used throughout quantum mechanics This non traditional presentation is designed to enhance students understanding and strengthen their intuitive grasp of the subject
