

VFD-L Series Instruction Sheet

1 Preface

Thank you for choosing DELTA VFD-L series AC Drive. The VFD-L series is manufactured using high-quality components, material and incorporating the latest microprocessor technology available.

This manual will help in the installation, parameter setting, troubleshooting, and safety maintenance of the AC motor drive. To guarantee safe operation of the equipment, read the following safety guidelines before connecting power to the AC motor drive. Keep the operating manual handy and distribute it to all users for reference.

1. All input power lines to Delta VFD-L series AC Drives are hazardous. An electric shock or electrical fire may occur if appropriate safety precautions are not followed. Read the safety guidelines carefully before connecting power to the VFD-L.

2. Always use VFD-L series AC Drive together with frequency converter cables. The power line length of 30m (98.4 ft) is recommended. To minimize the noise, after AC Drive and AC Motor are connected, the AC Drive should be started. Please note that there are two components connected when the AC Drive is open. It might be dangerous if the AC Drive is not started.

3. The AC Drive may be damaged if the power supply is interrupted. It is recommended that the equipment be grounded. After connecting the AC Drive, always use the VFD-L series AC Drive with the AC Drive.

4. There are highly sensitive MOS components in the printed circuit board. These components are especially sensitive to static electricity. It is recommended that the equipment be grounded. After connecting the AC Drive, always use the VFD-L series AC Drive with the AC Drive.

5. Ground the VFD-L using the ground terminal. The grounding method may vary with the type of the motor, please refer to the AC Drive manual for details.

2 Receiving and Inspection

The VFD-L AC Drive has gone through rigorous quality control tests at the factory before shipment. Since many things may happen during shipping, please check for the following after receiving the AC Drive:

1. Inspect the entire drive. Make sure it is not damaged during shipment.
2. Make sure that the part number indicated on the nameplate corresponds with the part number of your order.
