Demand Air Transport Services Report:

Securing the Future of U.S. Air Transportation National Research Council, Transportation Research Board, Studies and Information Services, Division on Engineering and Physical Sciences, Aeronautics and Space Engineering Board, Committee on Aeronautics Research and Technology for Vision 2050, 2003-12-18 As recently as the summer of 2001 many travelers were dreading air transportation because of extensive delays associated with undercapacity of the system That all changed on 9 11 and demand for air transportation has not yet returned to peak levels Most U S airlines continue to struggle for survival and some have filed for bankruptcy The situation makes it difficult to argue that strong action is urgently needed to avert a crisis of undercapacity in the air transportation system This report assesses the visions and goals for U S civil aviation and technology goals for the year 2050 **Report** United States. Congress. House, **Report on the Antitrust**

Subcommittee (Subcommittee No. 5) United States. Congress. House. Committee on the Judiciary. Subcommittee No. 5, 1958 Report of the Antitrust Subcommittee (Subcommittee No. 5) of the Committee on the Judiciary, House of Representatives, Eighty-fifth Congress, First Session, Pursuant to H. Res. 107, Authorizing the Committee on the Judiciary to Conduct Studies and Investigations Relating to Certain Matters Within Its Jurisdiction on Airlines United States. Congress. House. Committee on the Judiciary, 1957 **Global Governance of Civil Aviation Safety** Nilgun Ozgur, 2022-09-30 This book indicates the shortcomings of the current international legal system and customary international norms that govern international aviation law to comply with contemporary air transport market realities As the air transport market develops globally the safety regime of civil aviation should also be governed and applied globally In this book the author departs from current international legal norms to examine the emerging legal field of global administrative law Through that lens the possibility of reconstructing the set of legal mechanisms that govern domestic and international administrative interaction in the global field of aviation safety is explored This book demonstrates that a legal system is never complete but always develops in tandem with changing needs i e the participation of the affected parties Exploring the principles of GAL theory contributes to addressing the contemporary legal issues relating to state compliance with international aviation safety standards that would otherwise not be covered by customary international law In particular the principles of GAL theory regarding global governance and the public character of global regulations the role of individuals and states in global governance and state sovereignty are considered valuable contributions to contemporary global aviation safety issues in practice It is asserted in this book that proper checks and balances in global aviation safety can be improved by making these accessible to individuals by way of national courts Finally establishing public awareness of global aviation safety standards will eventually create greater pressure on states to implement and enforce them This book is in an area increasing academic and research interest of practitioners of public international aviation law global administrative law global governance and global aviation safety global air transport market regulations The Routledge Companion to Air Transport Management

Nigel Halpern, Anne Graham, 2018-01-31 The Routledge Companion to Air Transport Management provides a comprehensive up to date review of air transport management research and literature This exciting new handbook provides a unique repository of current knowledge and critical debate with an international focus considering both developed and emerging markets and covering key sectors of the air transport industry The companion consists of 25 chapters that are written by 39 leading researchers scholars and industry experts based at universities research institutes and air transport companies and organisations in 12 different countries in Africa Asia Pacific Europe and North America to provide a definitive trustworthy resource The international team of contributors have proven experience of research and publication in their specialist areas and contribute to this companion by drawing upon research published mainly in academic industry and government sources This seminal companion is a vital resource for researchers scholars and students of air transport management It is organised into three parts current state of the air transport sectors Part I application of management disciplines to airlines and airports Part II and key selected themes Part III

Efficiency and Growth of Ethiopian Air Transport Industry Tsegay Kaleab Atsbaha, 2022-09-19 This book evaluates the efficiency and growth of the Ethiopian air transport sector through careful analysis It provides essential research input for air transport industry practitioners in planning and resource management as well as for academics of advanced efficiency analysis who need to work and study in airports and the airline industry The book analyzes the theoretical and practical implications of air transport growth determinants airports cost and production efficiency including labor use efficiency by taking their respective determinant factors The findings and policy implications of each research work provide important inputs for government policymakers and air transport planners to consider the causality of economic growth versus airlines growth and other determinants to take lessons on the proper resource allocation in the application of airport cost and production efficiency human capital investment cost price of capital and labor inputs during the development and expansion of airports and airlines This book is the first of its kind on the Ethiopian air transport industry and serves as a much needed reference for the African air transport industry as well as other developing countries in terms of airport costs production labor use efficiency and airline growth perspectives
