Publisher's description:

*Teaching Middle School Writers* Laura Robb, 2010. My whole goal with this book was to come at teaching writing from the angle that matters most: students' perspective. They taught me what I needed to know to make this book live up to their passion for writing. Laura Robb: Adolescents have robust and rewarding writing lives outside of school that involve journals, emails, text messages, blogs, and an astounding array of genres. Unlike their personal reading lives, that teachers frequently tap into, their personal writings typically exist under the curricular radar that is, until now. While grounded in the common schedule constraints and curriculum demands of middle school, Laura Robb's *Teaching Middle School Writers* offers teachers lessons and routines that are uncommonly attuned to adolescents' developmental and social needs. As she taps into the energy

and enthusiasm of adolescents personal writing lives Laura presents writing plans that support first drafts strategies for crafting leads that grab and endings that satisfy grammar lessons that address writing conventions editing lessons that have students revise their writing before the teacher reads it guidelines for grading and responding to student work Straight from the classroom writing samples and videos give teachers the opportunity to see how Laura uses compelling questions and powerful mentor texts to teach writing support struggling writers and weave twenty first century literacies into the writing curriculum Throughout teachers learn ways of connecting to students lives in order to bring out their best writing their best self Watch a video overview *The English Classroom in the Computer Age* William Wresch,1991 Written by middle school high school and college writing teachers the 30 lesson plans collected in this book represent a mix of computer based units for teaching writing They cover many types of writing from journalism to literary essays fiction and poetry and many aspects of the writing process from brainstorming for ideas to prewriting warm ups electronic library research revision and desktop publishing Most of the lessons in the book are adaptations of lessons used for years without computers a small number of lesson plans in the book represent wholly new activities The lessons in the book follow a set format designed to help readers quickly find out which activities are most appropriate for them and are divided into categories for students with little moderate or substantial computer experience A directory of software and a list of contributors are attached RS
