Stiefel,Jeremy C. Wells,2014-09-02 Over the past twenty years there has been a fundamental shift in the institutional organization of historic preservation education Historic preservation is the most recent arrival in the collection of built environment disciplines and therefore lacks the pedagogical depth and breadth found in allied endeavors such as architecture and planning As the first degree programs in preservation only date to the 1970s and the first doctoral programs to the 1990s new faculty are confronted with pedagogical challenges that are unique to this relatively nascent field Based on a conference that included educators from around the world Barry L Stiefel and Jeremy C Wells now present a collection that seeks to address fundamental issues of preservation pedagogy outcome based education and assessment and global issues of authenticity and significance in historic preservation The editors argue that the subject of the analysis has shifted from What is the best way to fix a historic building to What are the best ways for teaching people how to preserve historic properties and why according to the various standards that have been established This important reconsideration of the state of the field in historic preservation education will appeal to a broad audience across numerous disciplines [Report Concerning the Study of Licensure of Landscape Architects in Virginia](#) Virginia.
