Ecological Living Dominique Gauzin-Müller,Cité de l'architecture et du patrimoine (Paris, France),Institut français d'architecture,2009 The pioneers of ecological architecture today are necessarily researchers as much as architects in any conventional sense of the term Sustainability is the key criterion in this field and ecologically sound solutions for the designs of homes are the key challenge homes the most commonly built structure Ecological Living assesses a selection of some recently built ecological habitats collecting several built examples from a variety of French architects examining precursors such as Frank Lloyd Wright Alvar Aalto and Pierre Lajus plus proposals for European architects and architecture students and inquiries into the ecological viability of detached housing and tower blocks The book is structured in thematic chapters such as Why is Action So Urgent The Precursors of Eco Responsible An International Panorama of the State of the Art and Into Action **Eco-Homes** Doctor Jenny Pickerill,2016-01-15 It is widely understood that good affordable eco housing needs to be at the heart of any attempt to mitigate or adapt to climate change This is the first book to comprehensively explore eco
