New Ecology for Education — Communication X Learning Will W.K. Ma, Chi-Keung Chan, Kar-wai Tong, Heidi Fung, Cheuk Wai Rose Fong, 2017-05-18 This book gathers the best papers from the HKAECT AECT 2017 Summer International Research Symposium Revealing the complex interactions between communication and learning which are represented by the symbol X in the title it provides a platform for knowledge exchange on the new ecology for education in the digital era It also equips readers to handle complex issues in both communication and education and clarifies the difference between practitioners and academics in communication and in education Carrion Ecology, Evolution, and Their Applications M. Eric Benbow, Jeffery K. Tomberlin, Aaron M. Tarone, 2025-07-17 The first edition of Carrion Ecology Evolution and Their Applications brought together multiple scientific disciplines to shed light on the importance of carrion within the context of ecology and evolutionary biology and through applications ranging from human mass disasters to habitat ecosystem conservation This second edition builds upon this foundation to include a huge amount of new research consisting of 33 chapters 9 brand new and the remaining 24 substantially updated and expanded One of the most significant changes for this edition is the coverage of aquatic ecosystems both freshwater and marine The book is now represented by 73 authors from eight countries incorporating more diverse perspectives and engagement into this multidisciplinary and expanding science The resulting new edition showcases a broader scope of topics geographic areas ecosystems and history of carrion ecology evolution and their applications for humanity It provides the most comprehensive resource on carrion from all ecosystems of the world The student academic and professional will find this book insightful providing new insights for the fields of molecular ecology microbiology entomology population biology community and ecosystem ecology as well as applications in forensics and human and environmental health **Evidential Statistics, Model Identification, and Science** Mark Louis Taper, Jose Miguel Ponciano, Yukihiro Toquenaga, Hidetoshi Shimodaira, 2022-02-15 **Natural Hazard Uncertainty Assessment** Karin Riley, Peter Webley, Matthew Thompson, 2016-11-15 Uncertainties are pervasive in natural hazards and it is crucial to develop robust and meaningful approaches to characterize and communicate uncertainties to inform modeling efforts In this monograph we provide a broad cross disciplinary overview of issues relating to uncertainties faced in natural hazard and risk assessment We introduce some basic tenets of uncertainty analysis discuss issues related to communication and decision support and offer numerous examples of analyses and modeling approaches that vary by context and scope Contributors include scientists from across the full breath of the natural hazard scientific community from those in real time analysis of natural hazards to those in the research community from academia and government Key themes and highlights include Substantial breadth and depth of analysis in terms of the types of natural hazards addressed the disciplinary perspectives represented and the number of studies included Targeted application centered analyses with a focus on development and use of modeling techniques to address various sources of uncertainty Emphasis on the impacts of

climate change on natural hazard processes and outcomes Recommendations for cross disciplinary and science transfer across natural hazard sciences This volume will be an excellent resource for those interested in the current work on uncertainty classification quantification and will document common and emergent research themes to allow all to learn from each other and build a more connected but still diverse and ever growing community of scientists Read an interview with the editors to find out more <https://eos.org/editors-vox-reducing-uncertainty-in-hazard-prediction>

Theoretical Ecology Kevin S. McCann, Gabriel Gellner, 2020-05-11 Theoretical Ecology concepts and applications continues the authoritative and established sequence of theoretical ecology books initiated by Robert M May which helped pave the way for ecology to become a more robust theoretical science encouraging the modern biologist to better understand the mathematics behind their theories This latest instalment builds on the legacy of its predecessors with a completely new set of contributions Rather than placing emphasis on the historical ideas in theoretical ecology the Editors have encouraged each contribution to synthesize historical theoretical ideas within modern frameworks that have emerged in the last 10-20 years e.g. bridging population interactions to whole food webs describe novel theory that has emerged in the last 20 years from historical empirical areas e.g. macro ecology and finally to cover the rapidly expanding area of theoretical ecological applications e.g. disease theory and global change theory The result is a forward looking synthesis that will help guide the field through a further decade of discovery and development It is written for upper level undergraduate students graduate students and researchers seeking synthesis and the state of the art in growing areas of interest in theoretical ecology genetics evolutionary ecology and mathematical biology
