by the Great Stagnation will eventually lead to a major fiscal and budgetary crisis impossibly expensive rentals for our most attractive cities worsening of residential segregation and a decline in our work ethic The only way to avoid this difficult future is for Americans to force themselves out of their comfortable slumber to embrace their restless tradition again

### **The Regulation of Megabanks** Katarzyna

Parchimowicz,2022-11-22 Global systemically important banks G SIBs are the largest most complex and in the event of their potential failure most threatening banking institutions in the world The Global Financial Crisis GFC was a turning point for G SIBs many of which contributed to the outbreak and severity of this downturn The unfolding of the GFC also revealed flaws and omissions in the legal framework applying to financial entities In the context of G SIBs it clearly demonstrated that the legal regimes both in the USA and in the EU grossly ignored the specific character of these institutions and their systemic importance complexity and individualism As a result of this omission these megabanks were long treated like any other smaller banking institutions Since the GFC legal systems have changed a lot on both sides of the Atlantic and global and national lawmakers have adopted new rules applying specifically to G SIBs to reduce their threat to financial stability This book explores whether the G SIB specific regulatory frameworks are adequately tailored to their individualism in order to prevent them from exploiting overly general rules as they did during the GFC Analyzing the specific character and individualism of G SIBs in relation to their history normal functioning as well as their operations during the GFC this book discusses transformation of banking systems and the challenges and opportunities G SIBs face such as Big Tech competitors climate related requirements and the COVID 19 pandemic Taking a multidisciplinary approach which combines financial aspects of operations of G SIBs and legal analysis the book describes G SIB oriented legal frameworks of the EU and the USA and assesses whether G SIB individualism is adequately reflected analyzing trends in supervisory action when it comes to discretion in the G SIB context all in order to contribute to the ongoing discussions about international banking law its problems and potential remedies to such persistent flaws

### **Too Smart for Our Own Good: Ingenious Investment Strategies, Illusions of Safety, and Market Crashes** Bruce I. Jacobs,2018-08-17

How investment strategies designed to reduce risk can increase risk for everyone and can crash markets and economies Financial crises are often blamed on unforeseeable events the unforgiving nature of capital markets or just plain bad luck Too Smart for Our Own Good argues that these crises are caused by certain alluring investment strategies that promise both high returns and safety of capital In other words the severe and widespread crises we have suffered in recent decades were not perfect storms Instead they were made by us By understanding how and why this is so we may be able to avoid or ameliorate future crises and maybe even anticipate them One of today s leading financial thinkers Bruce I Jacobs examines recent financial crises including the 1987 stock market crash the 1998 collapse of the hedge fund Long Term Capital Management the 2007 2008

credit crisis and the European debt crisis and reveals the common threads that explain these market disruptions In each case investors in search of safety were drawn to novel strategies that were intended to reduce risk but actually magnified it and blew up markets Too Smart for Our Own Good takes a behind the curtain look at The inseparable nature of investment risk and reward and the often counterproductive effects of some popular approaches for reducing risk A trading strategy known as portfolio insurance and the key role it played in the 1987 stock market crash How option related trading disrupted markets in the decade following the 1987 crash Why the demise of Long Term Capital Management in 1998 wreaked havoc on US stock and bond markets How mortgage backed financial products by shifting risk from one party to another created the credit crisis of 2007 2008 and contributed to the subsequent European debt crisis This broad detailed investigation of financial crises is the most penetrating and objective look at the subject to date In addition Jacobs an industry insider offers invaluable insights into the nature of investment risk and reward and how to manage risk Risk is unavoidable especially in investing and financial markets connect us all Until we accept these facts and manage risk in responsible ways major crises will always be just around the bend Too Smart for Our Own Good is a big step toward smarter investing and a better financial future for everyone **Monetary Policy & the Economy** ,2014 **"Code of Massachusetts regulations, 2014"** ,2014
