Views and Estimates of Committees of the House (With Additional, Supplemental, and Minority Views)..., May 2009, 111-1 Committee Print, Serial No. CP-1, 2009 **1968 Annual Supplement** John B. Simeone, Alfred de Grazia, Carl E. Martinson, 2013-12-01 *Views and Estimates of Committees of the House (together with Supplemental and Minority Views) on the Congressional Budget for Fiscal Year ...* United States. Congress. House. Committee on the Budget, 2009 **The Economic Adjustment Programme for Greece**, 2011 Reviews assessing Greek compliance with the terms and conditions of the economic adjustment programme required to be issued prior to the quarterly aid payments scheduled to be completed in 2013 **OECD Economic Surveys: Belgium 2009** OECD, 2009-07-08 This 2009 edition of OECD's periodic survey of Belgium explores how Belgium should cope with the economic crisis and includes chapters on securing fiscal sustainability improving fiscal federalism reforming the tax system and promoting OECD Economic Surveys Organisation for Economic Co-operation and Development, 2009 **Federal Register**, 2005-05-12 **Sustainability** Felix Ekardt, 2019-07-29 This book proposes a holistic transdisciplinary approach to sustainability as a subject of social sciences At the same time this approach shows new ways as perspectives of philosophy political science law economics sociology cultural studies and others are here no longer regarded separately Instead integrated perspectives on the key issues are carved out Perspectives on conditions of transformation to sustainability on key instruments and the normative questions This allows for a concise answer to urgent and controversial questions such as the following Is the EU an environmental pioneer Is it possible to achieve sustainability by purely technical means If not will that mean to end of the growth society How to deal with the follow up problems How will societal change be successful Are political power and capitalism the main barriers to sustainability What is the role of emotions and conceptions of normality in the transformation process To which degree are rebound and shifting effects the reason why sustainability politics fail How much climate protection can be claimed ethically and legally e g on grounds of human rights And what is freedom Despite all rhetoric the weak transition in energy climate agriculture and conservation serves as key example in this book It is shown how the Paris Agreement is weak with regard to details and at the same time overrules the growth society by means of a radical 1.5 1.8 degrees temperature limit It is shown how emissions trading must and can be reformed radically It is shown why CSR education cooperation and happiness research are overrated And we will see what an integrated politics on climate biodiversity nitrogen and soil might look like This book deals with conditions of transformation governance instruments ethics and law of sustainability The relevance of the humanities to sustainability has never before been demonstrated so vividly and broadly as here And in every area it opens up some completely new perspectives Prof Dr Dr h c mult Ernst Ulrich von Weizsäcker Club of Rome Honorary President Taking a transdisciplinary perspective the book canvasses the entire spectrum of issues relevant to sustainability A most valuable and timely contribution to the debate Prof Dr Klaus Bosselmann University of Auckland Author of *The Principle of*

Sustainability This book breathes life into the concept of sustainability Felix Ekardt tears down the barriers between disciplines and builds a holistic fundament for sustainability fit to guide long term decision making on the necessary transformation and societal change Prof Dr Christina Voigt Oslo University Dept of Public and International Law *Outlook on Agriculture*, 2015 *Agile Data-Oriented Research Tools to Support Smallholder Farm System Transformation* James Hammond, Mark Van Wijk, Aniruddha Ghosh, Tim Pagella, Jacob Van Etten, 2023-05-09 Smallholder farming systems contribute a substantial quantity of the food consumed in many lower and middle income countries and contribute to the national and local economies Despite the importance of smallholder farming a transformation is needed in order to deliver food security and decent incomes for the farmers themselves and at the national level This transformation must also be sustainable in terms of environmental impacts and social equity in order to be successful in the long term The pressures of population growth climate change and land fragmentation compound the problem Addressing these overlapping issues is a big challenge One obstacle is the lack of good quality granular data linking these issues together Household surveys are the workhorse method for gathering such data but there are well known problems that prevent household survey data from building up a big picture and delivering insights beyond the geographical boundary of each individual study Such obstacles include the lack of access to datasets differences in survey design and respondent biases Agile data oriented research tools can help to overcome these challenges We use the term agile to imply methods that do not attempt exhaustive measurements which are designed to be easy to use and which entail some degree of flexibility in terms of adaptation to local conditions and integration with other tools or methods Often these methods also nudge the behavior of tool users towards best practices In recent years various research tools and approaches have been published which fit within our definition of agile data oriented research tools The domains these tools function in include monitoring and evaluation intervention targeting tailored information delivery citizen science credit scoring and user feedback collection all with the overarching aim to improve data quality and access for those studying the sustainable development of smallholder farming systems The goal of this Research Topic is to better define that niche the ecosystem of tools and current practices and to explore how such approaches can provide the underpinning knowledge required for the transformation of smallholder farming systems One example of an agile data oriented research tool is the Rural Household Multi Indicator Survey RHoMIS It is a modular digital system for building household surveys addressing the common topics in smallholder development It was purposefully designed to give a broad overview of the farm system whilst keeping survey duration to a minimum to be user friendly in implementation and to be sufficiently flexible to function in a broad variety of locations and projects Since 2015 it has been used by 30 organizations in 32 countries to interview over 34 000 households The tool and database are open access and a community of practice is developing around the tool We particularly welcome contributions that engage with the RHoMIS tool and data However we also describe the tool in order to provide an example of what is meant by an agile data oriented research tool and welcome

contributions focusing on other tools or methodologies We encourage the submission of manuscripts addressing the above topic and those which fit within one of the following three sub themes i Perspectives or review articles which explore the niche best practices or promising approaches in agile data oriented research tools for smallholder farm system transformation Also technology and code articles that describe new tools are welcomed ii Original research articles presenting analyses based on data derived from agile data oriented tools used at the project level Examples include impact evaluations adoption studies targeting studies or adaptive management and should reflect on the additional benefit leveraged by the agile method applied iii Original research articles that make use of the large amounts of data generated by such agile methods and or link between agile data and other data sources Examples include meta analyses of data from multiple studies layering data collected from different agile tools or linking agile data to remote sensing or large scale modeling outputs
