Economic Paper Two November 2014:

Corporate Responsibility and Sustainable Development Lez Rayman-Bacchus, Philip R. Walsh, 2015-11-19 Corporate responsibility and sustainable development are two concepts that may be able to reconcile many of the big challenges facing the world challenges such as tensions between respect for the natural environment social justice and economic development the long view versus short term imperatives and the competing priorities between developed and developing economies This book explores the gaps and overlaps between corporate responsibility and sustainable development These concerns overlap because they implicate corporate practices state development policy challenges the concerns and priorities of non governmental organisations and the potential for innovative forms of organisation to address these challenges This collection examines these questions in terms of tensions and interdependencies between competing claims to resources rights and responsibilities strategy and governance between public and private interest and the implications for equity and the common good over the long term This is a valuable resource for researchers lecturers practitioners postgraduate and final year undergraduates in business strategy international business and international management public sector policy and management international development political economy It is also suitable for more specialist courses on sustainability corporate responsibility governance and international development

The UK Regional-National Economic Problem Philip McCann, 2016-03-10 In recent years the United Kingdom has become a more and more divided society with inequality between the regions as marked as it has ever been In a landmark analysis of the current state of Britain s regional development Philip McCann utilises current statistics examines historical trends and makes pertinent international comparisons to assess the state of the nation The UK Regional National Economic Problem brings attention to the highly centralised top down governance structure that the UK deploys and demonstrates that it is less than ideally placed to rectify these inequalities The North South divide in the UK has never been greater and the rising inequalities are evident in almost all aspects of the economy including productivity incomes employment status and wealth Whilst the traditional economic dominance of London and its hinterland has continued along with relative resilience in the South West of England and Scotland in contrast the Midlands the North of England Northern Ireland and Wales lag behind by most measures of prosperity This inequality is greatly limiting national economic performance and the fact that Britain has a below average standard of living by European and OECD terms has been ignored The UK s economic and governance inequality is unlikely to be fundamentally rebalanced by the current governance and connectivity trends although this definitive study suggests that some areas of improvement are possible if they are well implemented This pivotal analysis is essential reading for postgraduate students in economics and urban studies as well as researchers and policy makers in local and central government
