Recommended prior knowledge

No specific prior knowledge is required for this unit, although basic literacy skills combined with an ability to handle data and produce graphs and diagrams would be helpful. Learners who have previously studied IGCSE or O level Economics may be able to progress more quickly through certain topics in this section.

Context

At the outset of the course, it is essential that learners develop their understanding of the basic economic problem of scarcity and choice, and why this arises. This section also introduces the key fundamental economic ideas and principles which will underpin learning throughout the rest of the course. In particular, basic economic concepts and their links to the key concept *Scarcity and choice* are examined in detail.

Outline

The AS Level topics covered in this section are:

- scarcity, choice and opportunity cost
- positive and normative statements
- factors of production
- resource allocation in different economic systems and issues of transition
- production possibility curves
- money
- classification of goods and services.

Suggested teaching time

It is recommended that this section should take approximately 20% of the AS course (10% of the whole AS and A Level programme).
