## **Ecdl Powerpoint Exam Questions Answers:**

**History of Computing: Learning from the Past** Arthur Tatnall, 2010-08-06 History of Computing Learning from the Past Why is the history of computing important Given that the computer as we now know it came into existence less than 70 years ago it might seem a little odd to some people that we are concerned with its history Isn't history about old things Computing of course goes back much further than 70 years with many earlier vices rightly being known as computers and their history is of course important It is only the history of electronic digital computers that is relatively recent History is often justified by use of a quote from George Santayana who famously said that Those who cannot remember the past are condemned to repeat it It is arguable whether there are particular mistakes in the history of computing that we should avoid in the future but there is some circularity in this question as the only way we will know the answer to this is to study our history This book contains papers on a wide range of topics relating to the history of computing written both by historians and also by those who were involved in creating this history The papers are the result of an international conference on the History of Computing that was held as a part of the IFIP World Computer Congress in Brisbane in September 2010 **The Future of Learning Innovations and Learning Quality** Christian M. Stracke, 2012 Adult and Continuing Education: Concepts, Methodologies, Tools, and Applications Management Association, Information Resources, 2014-03-31 Beyond the undergraduate and graduate levels education has traditionally ceased when students enter the workforce as professionals in their respective fields However recent trends in education have found that adult students beyond the traditional university age often benefit greatly from returning to further their education Adult and Continuing Education Concepts Methodologies Tools and Applications investigates some of the most promising trends in furthering education and professional development in a variety of settings and industries With an extensive array of chapters on topics ranging from non traditional students to online and distance education for adult learners this multi volume reference book will provide students educators and industry professionals with the tools necessary to make the most of their return to the classroom **The Deepening Divide** Jan A. G. M. van Dijk, 2005-02-15 During the mid 90 s around the time the Internet became popular it became apparent that there was still one critical issue holding back limitless opportunities Computer professionals had to find a way to close the gap between those who do not have computer or Internet access and those who do also known as the digital divide Suddenly hundreds of conferences of computer professionals social scientists and government policy experts worldwide dedicated themselves to this concern Then the Internet hype seemed to dissipate and observers assumed the digital divide would fix itself The Deepening Divide Inequality in the Information Society explains why the digital divide is still widening and in advanced high tech societies deepening Taken from an international perspective the book offers full coverage of the literature and research and a theoretical framework from which to analyze and approach the issue Where most books on the digital divide only describe and analyze the issue Jan van Dijk presents 26 policy perspectives and instruments designed to

close the divide itself Written in a simple thorough and multidisciplinary approach The Deepening Divide offers insights to students researchers policymakers and professionals in media and communication studies sociology educational policy public policy and computer education Jan A G M van Dijk is an internationally recognized expert in the field of communication with new media studies as his primary interest The author of The Network Society Social Aspects of the New Media SAGE 1999 and co editor of Digital Democracy Issues of Theory and Practice SAGE 2000 van Dijk is a professor of Communication Science at Twente University the Netherlands and serves as an advisor of the European Commission of the Information Society Forum
