

ECON 1112 – Chapter 7 – Lecture Notes

1. Measuring Economic Performance

- Measuring the performance of an economy
- It is important to be able to understand and predict the effectiveness of policies and initiatives
- To understand this, we need to understand how economic activities flow
- We then need to identify the challenges related to measuring these flows in order to get an accurate picture of the economy

2. Flow of an Economy and National Income Accounting

- The "economy" is composed of HOUSEHOLDS and BUSINESSES
- The "input" for one comes from the "output" of the other

- **Factor Markets** is the flow for business to make products
- Factor services - Business input, Household output
- Total income – business output, household input
- Business pays household for their factor services
- **Product Markets** is the flow of products made by business
- Consumer goods – household input, business output
- \$ for final product – household output, business input
- Notice that households receive income from business that they use to pay for consumption
- Notice that business receive factor services that they use to make final consumer goods
- **TOTAL OUTPUT must equal TOTAL INPUT**
- Notice that **PROFIT** is what makes **TOTAL OUTPUT = TOTAL INPUT**

b. Accounting and Measuring the size of an economy

- To measure the size of the economy we only need to measure ONE of the output/inputs
- Why wouldn't we measure two? This would result in double counting

Ecn 1112 Chapter 2 Lecture Notes

Anthony S. Fauci

Ecn 1112 Chapter 2 Lecture Notes:

The Arcata Conference on Representations of Finite Groups, Part 2 Paul Fong, 1987 The papers in these proceedings of the 1986 Arcata Summer Institute bear witness to the extraordinarily vital and intense research in the representation theory of finite groups The confluence of diverse mathematical disciplines has brought forth work of great scope and depth Particularly striking is the influence of algebraic geometry and cohomology theory in the modular representation theory and the character theory of reductive groups over finite fields and in the general modular representation theory of finite groups The continuing developments in block theory and the general character theory of finite groups is noteworthy The expository and research aspects of the Summer Institute are well represented by these papers **29th Annual Frontiers in**
