The Coming Class War and How to Avoid It Frederick R. Strobel,Wallace C. Peterson,1999-05-07
Strobel and Peterson offer a clear accessible analysis of the worsening distribution of income and wealth in America In addressing the decline of the middle class the authors determine that the middle class has not only continued to shrink but that the majority of economic benefits have become concentrated into fewer and fewer hands There is a close analysis of the linkage between economic and political power as well as the increasing inability of the growing lower and shrinking middle classes to voice their economic views in Washington The result is a uniquely American form of class conflict which adds to our historic racial tension and new clashes along gender and generational lines Widening income disparities further split society Single issue politics often emerge as a refuge for those voters unwilling or unable to deal with these complicated and seemingly insoluble issues To prevent further class conflict in the coming quarter century the authors outline strategic changes in policy including a plan to strengthen social security Anyone with an interest in current economic issues and problems will find this book helpful in understanding how the worsening income and wealth distribution came about the consequences inherent in this situation and suggestions for the future Frederick R Strobel is the William G and Marie Selby Professor of Economics at the New College of the University of South Florida in Sarasota This is his second book on middle class decline He has written numerous articles on economics and economic policy which have appeared in a wide variety of business and professional journals including Business Week Chicago Tribune and American Banker Wallace C Peterson is the George Homes Professor of Economics Emeritus at the University of Nebraska in Lincoln This is also his second book on middle class decline He is the author of many other works on economic policy including the award winning newspaper column Money in America He is the past president of several academic associations including the Midwest Economics Association the Association for Evolutionary Economics and the Association for Social Economics

The New Golden Age Ravi Batra,2014-12-02 In The New Golden Age bestselling author and economist Ravi Batra identifies the roadblocks to economic prosperity and what we need to do to overcome them Bringing the same insight and expertise that made books like The Downfall of Capitalism and Communism

international bestsellers Batra takes on falling minimum wages corporate scandals rocketing oil prices and many of the other crises facing the world economy He also offers an expansive optimistic vision of how the international community can address them and bring about something historically unprecedented true global economic prosperity The Federal Budget Process, V.2 Bill Heniff Jr., Robert Keith, Megan Lynch, 2018-06-20 Budgeting for the federal government is an enormously complex process It entails dozens of subprocesses countless rules and procedures the efforts of tens of thousands of staff persons in the executive and legislative branches and the active participation of the President congressional leaders Members of Congress and members of the executive branch This analysis shows the various elements of the federal budget process including the President's budget submission framework timetable the budget resolution reconciliation the Byrd Rule appropriations authorizations and budget execution Congress is distinguished from nearly every other legislature in the world by the control it exercises over fashioning the government's budgetary policies This power referred to as the power of the purse ensures Congress primary role in setting revenue and borrowing policies for the federal government and in determining how these resources are spent The congressional power of the purse derives from several key provisions in the Constitution Article I Section 8 Clause 1 Power to tax and spend declares in part that Congress shall have the power to raise that is to lay and collect revenues of various types including taxes and duties among other things Article I Section 8 Clause 2 Borrowing power declares that the power to borrow funds on the credit of the United States belongs to Congress In addition to its powers regarding revenues and borrowing Congress exerts control over the expenditure of funds Article I Section 9 Clause 7 declares in part that funds can be withdrawn from the Treasury only pursuant to laws that make appropriations Under the Constitution revenue measures must originate in the House of Representatives Beyond this requirement however the Constitution does not prescribe how the House and Senate should organize themselves or the procedures they should use to conduct budgeting Over the years however both chambers have developed an extensive set of rules some set forth in statute and precedents that lay out complicated multiple processes for making budgetary decisions The House and Senate have also created an intricate committee system to support these processes As American society has grown and become ever more complex and as the role of the federal government in the national economy has steadily expanded Congress also has increasingly shared power over budgetary matters with the president and the executive branch It has refashioned the president's role in budgeting by requiring him to submit to Congress each year a budget for the entire federal government and giving him responsibilities for monitoring agencies implementation of spending and revenue laws Accordingly the president also exercises considerable influence over key budget decisions

World Economic Outlook, October 2016 International Monetary Fund. Research Dept., 2016-10-04 According to the October 2016 World Economic Outlook global growth is projected to slow to 3.1 percent in 2016 before recovering to 3.4 percent in 2017 The forecast revised down by 0.1 percentage point for 2016 and 2017 relative to April s report reflects a more subdued outlook for advanced economies following the June U K vote in favor of leaving the European Union Brexit and weaker than expected growth in the United States These developments have put further downward pressure on global interest rates as monetary policy is now expected to remain accommodative for longer Although the market reaction to the Brexit shock was reassuringly orderly the ultimate impact remains very unclear as the fate of institutional and trade arrangements between the United Kingdom and the European Union is uncertain Financial market sentiment toward emerging market economies has improved with expectations of lower interest rates in advanced economies reduced concern about China s near term prospects following policy support to growth and some firming of commodity prices But prospects differ sharply across countries and regions with emerging Asia in general and India in particular showing robust growth and sub Saharan Africa experiencing a sharp slowdown In advanced economies a subdued outlook subject to sizable uncertainty and downside risks may fuel further political discontent with anti

integration policy platforms gaining more traction Several emerging market and developing economies still face daunting policy challenges in adjusting to weaker commodity prices These worrisome prospects make the need for a broad based policy response to raise growth and manage vulnerabilities more urgent than ever **C.F.A.
