*BRICS and International Tax Law* Peter Antony Wilson, 2016-04-24 With the ongoing expansion of outbound foreign direct investment FDI in the countries representing the BRICS economic bloc Brazil Russia India China and South Africa and with all of them at the same time listed among the top seven countries plagued by tax evasion and avoidance in the guise of illicit outflows the respective governments both individually and through cooperative initiatives have devised new international tax strategies that are proving to be of great interest and value to other countries both developing and developed The core of these strategies addresses the necessity of stemming the outflow of revenue while strongly supporting FDI both inbound and outbound while complying with international obligations including those arising from human rights laws This book is the first in depth commentary on this new and evolving area of international tax law The detailed analysis covers the entire field of BRICS international tax law considering topics such as the following information exchange procedures and pitfalls response to the OECD's Base Erosion and Profit Sharing BEPS initiative role of bilateral and multilateral double taxation conventions including the Multilateral Instrument and the Bilateral Investment Treaties thin capitalization transfer pricing controlled foreign corporation rules shortcomings related to authorities limited manpower international audit and investigation procedures the BRICS approach to residence and mandatory and binding arbitration and the BRICS approach to shaping the developing world's international tax system Notably the author personally conducted interviews with senior international representatives of the BRICS tax authorities as well as with leading BRICS academics and practitioners Tax cases together with human rights and investment cases and administrative guidelines in all respective countries are also included in the analysis The study concludes with recommendations for improving each of the respective countries tax law and procedures especially in the area of dispute resolution The author's goal is to extend the existing body of knowledge of the BRICS international tax laws in order to assist in developing an understanding of the BRICS approach to dealing with evasion and avoidance an approach which facilitates both outbound and inbound FDI simplifies tax authority administration and establishes a basis for resolving international disputes which is compatible with sovereignty In achieving this objective the author has produced a major work that is of immeasurable value to tax advisers government and governance officials academics and researchers both in

developing international taxation strategies and in helping to resolve disputes with tax authorities      Principles of Financial Regulation John Armour, Dan Awrey, Paul Davies, Luca Enriques, Jeffrey N. Gordon, Colin Mayer, Jennifer Payne, 2016-08-04 The financial crisis of 2007-9 revealed serious failings in the regulation of financial institutions and markets and prompted a fundamental reconsideration of the design of financial regulation As the financial system has become ever more complex and interconnected the pace of evolution continues to accelerate It is now clear that regulation must focus on the financial system as a whole but this poses significant challenges for regulators Principles of Financial Regulation describes how to address those challenges Examining the subject from a holistic and multidisciplinary perspective Principles of Financial Regulation considers the underlying policies and the objectives of regulation by drawing on economics finance and law methodologies The volume examines regulation in a purposive and dynamic way by framing the book in terms of what the financial system does rather than what financial regulation is By analysing specific regulatory measures the book provides readers to the opportunity to assess regulatory choices on specific policy issues and encourages critical reflection on the design of regulation      Society at a Glance 2019 OECD Social Indicators OECD, 2019-03-27 This report the ninth edition of the biennial OECD overview of social indicators addresses the growing demand for quantitative evidence on social well being and its trends This year's edition presents 25 indicators several of which are new and includes data for 36 OECD member countries and      *The Flight of Icarus* Yiannis Drossos, 2020-12-10 This book provides a detailed analysis of the institutional transformations brought about by the financial crisis focusing on the institution building course of Europe and the Constitution bending course in several Member States It discusses the seemingly contradictory interplay between national and European institutions and the law resulting from the crisis arguing that the anti crisis exceptionality constitutes the matrix of the new normality of the reformed European economic governance The author carries out a critical analysis of the new economic governance and its case law with regular reference to relevant political episodes key economic figures and to the hitherto lax modes and rules The author also offers deep insights into the Greek adjustment programme and the crisis related Greek and Portuguese constitutional case law presented in comparison with the German and French case law The book concludes with a critical overview of the profound mutations in the role of national Constitutions instigated by the new European economic governance and the emergence of a democratically deficient meta constitutional mode of functioning of both the European institutions and national Constitutions      **European Energy Security and US-Russian Competition** Ioanna Mavromati, 2025-10-31 This book argues that the influence of US Russian security competition on the energy policies of EU member states and on the development of a unified European energy security policy has been significantly underestimated While most previous studies have focused on internal EU dynamics and the role of Russian interests this work takes a broader perspective by examining how transatlantic rivalries have shaped European approaches to energy security By tracing the evolution of European energy security policy from the Cold War era through the present the book

connects shifts in policy to the changing dynamics of US Soviet and later US Russian energy competition. It demonstrates that after the Soviet Union's collapse the United States did not initially view European reliance on Russian energy as a threat. However, as US-Russian competition intensified, Washington increasingly framed Europe's dependence on Russian gas as a security risk and actively sought to block the expansion of Russian energy infrastructure into Europe. The book also explores how despite the EU's early treaties being energy focused, energy security only became a central foreign policy concern for the Union in the mid 2000s. Ultimately, the author argues that scholars of international relations must consider both great power dynamics and intra-European factors to fully understand the development of European energy policy. The book will be of interest to students and researchers in geopolitics, international relations, energy politics, regional studies, and European studies.

**Sanctions for Nuclear Disarmament and Non-Proliferation** Armend Bekaj, Peter Wallensteen, 2024-09-02

This book examines the interplay between sanctions and nuclear disarmament and non-proliferation. The volume aims to tackle three separate but closely intertwined issues. It aims to revisit the debate on and deconstruct the concept of sanctions to provide a working theoretical framework to differentiate between positive sanctions or incentives or carrots and negative sanctions to identify the actors who may initiate sanctions, i.e. states, regional and/or international organizations to ascertain the legality and legitimacy of such sanctions, taking place to problematize and discuss the utility of sanctions and so on. It aims to disentangle the concepts of nuclear disarmament and non-proliferation particularly in light of the most recent geopolitical global shifts on nuclear powers' interplay taking place in the background of the war in Ukraine and rising tensions in Southeast Asia and so on. Finally, it aims to conjoin the cause and effect cases between the application of sanctions on the one hand and the decision by states to pursue nuclear disarmament and non-proliferation on the other. By doing so, the volume helps to update and stimulate the academic and policy debate on the interrelation between sanctions and nuclear disarmament and non-proliferation. This book will be of much interest to students of nuclear non-proliferation, economic sanctions, security studies, and International Relations.
