*Handbook on the Economics of Climate Change* Graciela Chichilnisky, Armon Rezai, 2020-06-26 This timely Handbook recognises the emergence of climate change as the defining topic of our time With public climate discourse growing more urgent every year this Handbook brings together international experts from different economic disciplines to answer critical climate policy questions      The Quarterly Review of Economics and Finance ,2014      **The Meritocracy Trap** Daniel Markovits, 2020-09-08 A revolutionary new argument from eminent Yale Law professor Daniel Markovits attacking the false promise of meritocracy It is an axiom of American life that advantage should be earned through ability and effort Even as the country divides itself at every turn the meritocratic ideal that social and economic rewards should follow achievement rather than breeding reigns supreme Both Democrats and Republicans insistently repeat meritocratic notions Meritocracy cuts to the heart of who we are It sustains the American dream But what if both up and down the social ladder meritocracy is a sham Today meritocracy has become exactly what it was conceived to resist a mechanism for the concentration and dynastic transmission of wealth and privilege across generations Upward mobility has become a fantasy and the embattled middle classes are now more likely to sink into the working poor than to rise into the professional elite At the same time meritocracy now ensnares even those who manage to claw their way to the top requiring rich adults to work with crushing intensity exploiting their expensive educations in order to extract a return All this is not the result of deviations or retreats from meritocracy but rather stems directly from meritocracy's successes This is the radical argument that Daniel Markovits prosecutes with rare force Markovits is well placed to expose the sham of meritocracy Having spent his life at elite universities he knows from the inside the corrosive system we are trapped within Markovits also knows that if we understand that meritocratic inequality produces near universal harm we can cure it When *The Meritocracy Trap* reveals the inner workings of the meritocratic machine it also illuminates the first steps outward towards a new world that might once again afford dignity and prosperity to the American people      **The Regulation of Megabanks** Katarzyna Parchimowicz, 2022-11-22 Global systemically important banks G-SIBs are the largest most complex and in the event of their potential failure most threatening banking institutions in the world The Global Financial Crisis GFC was a turning point for G-SIBs many of which contributed to the outbreak and severity of this downturn The unfolding of the GFC also revealed flaws and omissions in the legal framework applying to financial entities In the context of G-SIBs it clearly demonstrated that the legal regimes both in the USA and in the EU grossly ignored the specific character of these institutions and their systemic importance complexity and individualism As a result of this omission these megabanks were long treated like any other smaller banking institutions Since the GFC legal systems have changed a lot on both sides of the Atlantic and global and national lawmakers have adopted new rules applying specifically to G-SIBs to reduce their threat to financial stability This book explores whether the G-SIB specific regulatory frameworks are adequately tailored to their individualism in order to

prevent them from exploiting overly general rules as they did during the GFC Analyzing the specific character and individualism of G SIBs in relation to their history normal functioning as well as their operations during the GFC this book discusses transformation of banking systems and the challenges and opportunities G SIBs face such as Big Tech competitors climate related requirements and the COVID 19 pandemic Taking a multidisciplinary approach which combines financial aspects of operations of G SIBs and legal analysis the book describes G SIB oriented legal frameworks of the EU and the USA and assesses whether G SIB individualism is adequately reflected analyzing trends in supervisory action when it comes to discretion in the G SIB context all in order to contribute to the ongoing discussions about international banking law its problems and potential remedies to such persistent flaws
