Topic 14: Solve Time, Capacity and Mass Problems

Lesson 14-1: Time to the Minute

Essential Question: How do you tell time to the nearest minute?

Objective: Students will be able to show and tell times in the nearest minute using analog and digital clocks

Look Back and This Lesson: In grade 2, you learned to tell times in the nearest 5 minutes and you learned about patterns with five as a factor in topic two. Today we will apply our knowledge of counting by 5s (and 1s) to tell time to the nearest minute.

3.MD.A.1 – Solve Problems Involving Measurement and Estimation of Intervals of Time, Liquid Volumes, and Masses of Objects

Vocabulary

Solve and Share

- To introduce the skill, as a whole class, engage in workbook page
- Have students read the problem and tell the times shown on each of 4 clocks
- Remind students to use structure by recalling that each green tick mark on a clock represents a unit of one minute
- Have students explain how they solved

Model: Visual Learning Bridge

Teacher will say out loud and “think” aloud the steps being taken to solve the problem

- Teacher reads problem aloud
- Teacher models using the example provided, “think” aloud, explaining how I can tell time to the nearest minute, highlighting the difference between analog and digital clocks

Convince Me!

Have students read the problem and solve the problem using analog, digital, and two other ways

Guided Practice

- Guide students in the activity
- Have students solve problems 1-4 by solving clock problems and writing time in different way
- Have students explain how they solved

Independent Practice

- Students will work individually to show and tell times to the nearest minute using analog and digital clocks

Differentiation

Intervention

1. **Color the Clock Face** – Give students clock templates where they color-code the hour and minute hands in different colors to reinforce their roles
2. **Time Showrunner** – Most different students around the room showing various times to the minute. Students walk around and record the digital time they see.
3. **Verbal Time Builders** – Sentence frames like “The time is ____ because the minute hand is on ____ and the hour hand is on ____ and ____” to build confidence in telling time.
4. **Intervention Activity in Workbook:** “Counting Minutes”

Enrichment

1. **Time Riddle Creation** – Students write riddles like “I am a time with the minute hand on 8 and the hour hand just past 2. What time am I?”
2. **Clock Design Project** – Let students design their own clocks (paper or digital) with times labeled and decorative themes. They can quiz each other using their custom clocks.
3. **Explain It! Videos** – Have students record short clips explaining how to tell time to the minute on both analog and digital clocks, encouraging precision and mathematical language.
