**Difference Maker** Christian Moore-Anderson, 2024-08-09 Rarely have I been so convinced by the power of a new theoretical underpinning for a pedagogical technique such as the one presented here Helen Darlington Faculty Progress Leader for Science at South Wirral High School reviewed in School Science Review From the author of Biology Made Real Difference Maker reveals how to teach with students rather than merely teach to them Without slides or worksheets it shows how to provoke understanding through diagrams and dialogue bringing forth a distinct teaching approach Inside you ll find The recursive teaching model An evidence and theory inspired model for co constructing meaning with students rather than just telling them or having them discover alone Detailed examples of real lessons The exact diagrams I ve drawn in lessons and how I ve built them step by step with students Plus the questions I ve asked at what point in the lesson and why A theory informed how to guide for planning explanations How to explain biological concepts by applying the variation theory of learning and enactive cognitive science The resulting heuristic cuts planning time while vastly improving students understanding A theory informed how to guide for adaptive teaching Adapting is essential in the moment as you never know how students will interpret a new explanation With an original model for productive conversation I unveil the types of questions that generate understanding and rich feedback for the teacher These looping conversations trigger a coordinated co regulation between teacher and students ensuring mutual understanding before moving forward A theory informed how to guide for co constructing stock and flow diagrams There are several benefits 1 building these models clarifies your understanding to yourself and your students and 2 teaching becomes more conceptual conversational adaptive and enjoyable I show how to read design and teach with them through detailed lesson examples Plus an appendix of 37 diagrams I ve used with my classes A new model of curricular content metacontent The curriculum is not just a list of content of equal weight

There are fundamental ideas that give meaning to the rest of the curriculum By including this metacontent in teaching a shared way of seeing and talking about our subjects emerges The first type of metacontent I explain is a set of principles that I share with students and discuss during every topic These unifying principles avoid the feeling that biology is just a lot of facts to learn The second type is understanding understanding itself I share a taxonomy of understanding that allows students to grasp what I expect of them in every topic I provide example sentences for each level of understanding questions I've asked to test my students understanding and answers my students have given A way of seeing and being Rather than a training manual with activities to follow this book provides teachers with a new conception of teaching learning and acting together in the classroom The novel insights of Difference Maker will inevitably change your perception **Jacaranda Science Quest 8 Australian Curriculum, 4e learnON and Print** Graeme Lofts, Merrin J.
